Over the past six or more decades John Friedmann has been an insurgent force in the field of urban and regional planning transforming it from its traditional state centered concern for establishing social and spatial order into a radical domain of collaborative action between state and civil society for creating the good society in the present and future By opening it up to theoretical engagement with a wide range of disciplines Friedmann's contributions have revolutionised planning as a transdisciplinary space of critical thinking social learning and reflective practice Insurgencies and Revolutions brings together former students close research associates and colleagues of John Friedmann to reflect on his contributions to planning theory and practice The volume is organized around five broad themes where Friedmann's contributions have risen to challenge established paradigms and generated the space for revolutionary

thinking and action in urban and regional planning Theorising hope Economic development and regionalism World cities and the Good city Social learning empowered communities and citizenship and Chinese cities The essays by the authors reflect their engagement with his ideas and the new directions in which they have taken these in their work in planning theory and practice **Planning Canadian Regions, Second Edition** Gerald Hodge, Heather M. Hall, Ira M. Robinson, 2017-01-05

Planning Canadian Regions was the first book to integrate the history contemporary practice and emergent issues of regional planning in Canada This much anticipated second edition brings the discussion up to date applying the same thorough analysis to illuminate the rapid changes now shaping our regional landscapes This new edition draws upon contemporary analyses projects and literature to address issues of spatial complexity now facing regional planners in Canada Special attention is paid to the regional planning dimensions of climate change adaptation and environmental sustainability across Canada the development inequities faced in peripheral resource regions the role that Aboriginal peoples must play in the planning of their regions and the distinctive planning needs of metropolitan regions across the country This book challenges planners educators and policy makers to engage with the latest thinking and strive for best practices in twenty first century regional planning **The Spatial Organization Of New Land Settlement In Latin America** Jacob O Maos, 2019-07-11

Land settlement in Latin America has become a subject of growing concern as governments renew efforts to develop agrarian potential and to relieve the pressure on overpopulated rural and urban areas In this book land settlement is viewed as the development of resources both human and natural The spatial organization of land settlement is examined in light of social and spatial patterns that may complement economic activities lead to viable communities and facilitate the provision of social and cultural amenities The farm family is seen as the basic socioeconomic unit and the family farmstead as the basic spatial nucleus **Shaping the Metropolis** Zack Taylor, 2019-05-23

Rising income inequality and concentrated poverty threaten the social sustainability of North American cities Suburban growth endangers sensitive ecosystems water supplies and food security Existing urban infrastructure is crumbling while governments struggle to pay for new and expanded services Can our inherited urban governance institutions and policies effectively respond to these problems In Shaping the Metropolis Zack Taylor compares the historical development of American and Canadian urban governance both at the national level and through specific metropolitan case studies Examining Minneapolis St Paul and Portland Oregon in the United States and Toronto and Vancouver in Canada Taylor shows how differences in the structure of governing institutions in American states and Canadian provinces cumulatively produced different forms of urban governance Arguing that since the nineteenth century American state governments have responded less effectively to rapid urban growth than Canadian provinces he shows that the concentration of authority in Canadian provincial governments enabled the rapid adoption of coherent urban policies after the Second World War while dispersed authority in American state governments fostered indecision and catered to parochial interests Most contemporary policy problems and their solutions are to be found in cities

Shaping the Metropolis shows that urban governance encompasses far more than local government and that states and provinces have always played a central role in responding to urban policy challenges and will continue to do so in the future

Regions in Recession and Resurgence Michael Chisholm,2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relvance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic thery regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

The Government of Emergency Stephen J. Collier,Andrew Lakoff,2021-11-30 In the middle decades of the twentieth century in the wake of economic depression war and in the midst of the Cold War an array of technical experts and government officials developed a substantial body of expertise to contain and manage the disruptions to American society caused by unprecedented threats Today the tools invented by these mid twentieth century administrative reformers are largely taken for granted assimilated into the everyday workings of government As Stephen Collier and Andrew Lakoff argue in this book the American government s current practices of disaster management can be traced back to this era Collier and Lakoff argue that an understanding of the history of this initial formation of the emergency state is essential to an appreciation of the distinctive ways that the U S government deals with crises and emergencies or fails to deal with them today This book focuses on historical episodes in emergency or disaster planning and management Some of these episodes are well known and have often been studied while others are little remembered today The significance of these planners and managers is not that they were responsible for momentous technical innovations or that all their schemes were realized successfully Their true significance lies in the fact that they formulated a way of understanding and governing emergencies that has come to be taken for granted

Development Issues of Our Time Rameshwar Prasad Misra,1985

Towards Equitable Progress K. Locana Gunaratna,2018-06-02 This

book gathers a collection of essays presented from the perspective of a spatial planner whose working life has been immersed in South Asia. It concerns some of the serious challenges that need to be confronted in the South Asian context including the externalities and ethical concerns that arise in the process of development. The mid 20th century saw a considerable focus in the West on assisting those countries emerging from European colonial domination. Theories were propounded and international agencies established to facilitate a process called development in these countries. However, even after six decades of extraordinary expenditures and effort, millions among the targeted populations remain illiterate, live in abject poverty and are the most vulnerable groups to external disasters, debilitating diseases and untimely death. In addition, the book reveals the theoretical inadequacies that negatively impact ongoing development efforts. Lastly, it identifies an available alternative set of science-based approaches that could facilitate the serious pursuit of equitable progress in South Asia and potentially also in other low and middle income countries. *Routledge Library Editions: Economic Geography* Various, 2021-06-23. The books in this set, originally published between 1968 and 1992, introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy. As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies, these volumes examine the economic factors that have shaped cities and patterns of urbanization.

The City in the Developing World Robert B. Potter, Sally Lloyd-Evans, 2014-09-25. The *City in the Developing World* is a comprehensive and up-to-date introduction to urbanisation in developing countries. The goal of this text is to place an understanding of the developing world city in its wider global context. First, this is done by developing the concept of social surplus product as a key to understanding the character of the contemporary Third World city. Second, throughout this text, the city in developing areas is centrally placed in the context of global social, economic, political and cultural change. Thus, the important themes of globalisation, modernity and postmodernity are examined both in relation to the structure of sets of towns and cities which make up the national or regional urban system and in respect of ideas and concepts dealing with the morphology, structure and social patterning of individual urban areas. The *City in the Developing World* is a core text for second and third year undergraduates in the fields of geography, development studies, planning, economics and the social sciences, taking options which deal with development issues, development theory, gender and development and Third World development. *Learning Transnational Learning* Åge Mariussen, Seija Virkkala, 2013-05-02. Systems of innovation that are conducted within national borders can preserve inefficient solutions and prevent development. This has led to a feeling that transnational learning strategies are more and more desirable. In practice, the field of transnational learning has been dominated by various policy-making institutions such as the OECD and European Union, working through different types of policy instruments and programs such as structural funds, open methods of coordination as well as international research institutions and networks set up by cooperating

national governments working on comparative analysis benchmarking and indicators This book lays out a set of methods which can further enhance the experience of transnational learning starting from the sociological ideas promoted by Charles Sabel of learning through monitoring and by Marie Laure Djelic and others of the translation of experiences between different countries Case studies and examples are collected from three fields industrial development tourism and local government

Understanding Local Economic Development Emil Malizia, Edward J. Feser, Henry Renski, Joshua Drucker, 2020-10-05 This book offers insights into the process and the practice of local economic development Bridging the gap between theory and practice it demonstrates the relevance of theory to inform local strategic planning in the context of widespread disparities in regional economic performance The book summarizes the core theories of economic development applies each of these to professional practice and provides detailed commentary on them This updated second edition includes more recent contributions regional innovation agglomeration and dynamic theories and presents the major ideas that inform economic development strategic planning particularly in the United States and Canada The text offers theoretical insights that help explain why some regions thrive while others languish and why metropolitan economies often rise and fall over time Without theory economic developers can only do what is politically feasible This text however provides them with a logical tool for thinking about development and establishing an independent basis from which to build the local consensus needed for evidence based action undertaken in the public interest Offering valuable perspectives on both the process and the practice of local and regional economic development this book will be useful for both current and future economic developers to think more profoundly and confidently about their local economy The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
