*The Second World War Tank Crisis* Dick Taylor,2021-06-30 British Second World War tanks performed so badly that it is difficult to bring to mind any other British weapon of the period that provokes such a strong sense of failure Unfortunately many of the accusations appear to be true British tanks were in many ways a disgrace But why was Britain the country that invented them consistently unable to field tanks of the required quality or quantity throughout the conflict This perceived failure has taken on the status of a myth but like all myths it should not be accepted at face value it should be questioned and analyzed And that is what Dick Taylor does in this closely researched and absorbing study He looks at the flaws in British financial policy tank doctrine design production and development before and throughout the war years which often had fatal consequences for the crews who were sent to fight and to be murdered in mechanical abortions Their direct experience of the shortcomings of these machines is an important element of the story He also considers how British tanks compared to those of the opposition and contrasts tank production for the army with the production of aircraft for the RAF during the same period His clear sighted account goes on to explain

how later in the conflict British tank design improved to the point where their tanks were in many ways superior to those of the Americans and Germans and how they then produced the Centurion which was one of the best main battle tanks of the post war era

**A Cultural History of Work in the Modern Age** Daniel J. Walkowitz, 2020-09-17 Winner of the 2020 PROSE Award for Multivolume Reference Humanities Changes in production and consumption fundamentally transformed the culture of work in the industrial world during the century after World War I In the aftermath of the war the drive to create new markets and rationalize work management engaged new strategies of advertising and scientific management deploying new workforces increasingly tied to consumption rather than production These changes affected both the culture of the workplace and the home as the gendered family economy of the modern worker struggled with the vagaries of a changing gendered labour market and the inequalities that accompanied them This volume draws on illustrative cases to highlight the uneven development of the modern culture of work over the course of the long 20th century A Cultural History of Work in the Modern Age presents an overview of the period with essays on economies representations of work workplaces work cultures technology mobility society politics and leisure

**'Totally un-English'?**, 2005-01-01 The internment of enemy aliens by the British government in two world wars remains largely hidden from history British historians have treated the subject if at all as a mere footnote to the main narrative of Britain at war In the Great War Britain interned some 30 000 German nationals most of whom had been long term residents In fact internment brought little discernible benefit but cruelly damaged lives and livelihoods breaking up families and disrupting social networks In May 1940 under the threat of imminent invasion the British government interned some 28 000 Germans and Austrians mainly Jewish refugees from the Third Reich It was a measure which provoked lively criticism not least in Parliament where one MP called the internment of refugees totally un English The present volume seeks to shed more light on this still submerged historical episode adopting an interdisciplinary approach to explore hitherto under researched aspects including the historiography of internment the internment of women deportation to Canada and culture in internment camps including such notable events as the internment revue What is Life

**The Hidden History of Bletchley Park** C. Smith, 2015-08-26 This book is a hidden history of Bletchley Park during the Second World War which explores the agency from a social and gendered perspective It examines themes such as the experience of wartime staff members the town in which the agency was situated and the cultural influences on the wartime evolution of the agency

**Death from the Skies** Dietmar Süß, 2014-02-06 The German Blitz that followed the Battle of Britain killed tens of thousands and laid waste to large areas of many British cities And although the destruction of 1940 was never repeated on the same scale fears that Hitler possessed a secret weapon of mass destruction never entirely died and were partially realized in the V1 and V2 raids of 1944

5 The British and American response to the Blitz especially from 1943 onwards was massive and incomparably more devastating with apocalyptic consequences for German cities such as Hamburg Dresden and Berlin to name but the most prominent In this ground

breaking new book German historian Dietmar S ss investigates the effects of the bombing on both Britain and Nazi Germany showing how these two very different societies sought to withstand the onslaught and keep up morale amidst the material devastation and psychological trauma that was visited upon them And as he reflects in the conclusion this is not a story that is safely confined to the past the debate over the rights and the wrongs of the mass bombing of British and German cities during World War II remains a highly emotional subject even today
