Testament und Siegel Ivans IV. Günther Stökl, 1972 **Succession to the Throne in Early Modern Russia** Paul Bushkovitch, 2021-03-18 This revisionist history explores how the tsar's power was transferred in Russia over three centuries as cultural practices and customs evolved Ivan the Terrible Charles J. Halperin, 2019-09-13 Ivan the Terrible is infamous as a sadistic despot responsible for the deaths of thousands of innocent people particularly during the years of the oprichnina his state within a state Ivan was the first ruler in Russian history to use mass terror as a political instrument However Ivan's actions cannot be dismissed by attributing the behavior to insanity Ivan interacted with Muscovite society as both he and Muscovy changed This interaction needs to be understood in order properly to analyze his motives achievements and failures Ivan the Terrible Free to Reward and Free to Punish provides an up to date comprehensive analysis of all aspects of Ivan's reign It presents a new interpretation not only of Ivan's behavior and ideology but also of Muscovite social and economic history Charles Halperin shatters the myths surrounding Ivan and reveals a complex ruler who had much in common with his European contemporaries including Henry the Eighth **The Impact of Nuclear Power on the Public: The American Experience** Victor Potter Bond, 2013-04-17 The American experience with respect to electrical power production has undergone and is undergoing considerable evolution Early frequently strident debates tended to focus on the risks and benefits of only one possible power source nuclear and on one possible hazard radiation from routine releases Discussions and analyses now have tended to become more moderate and deal with not only one but all feasible power sources as well as the costs and benefits associated with fuel production the operation of such sources fuel transportation and waste disposal Radiation from routine releases is no longer a major issue A number of attempts have been made to assess the total benefits and risks of nuclear versus fossil fuel plants in order to allow a rational basis for deciding on what type of source is best for a given situation More data and more refined analyses are needed however most of those completed to date have concluded that the overall cost in terms of possible damage to health and the environment is least for nuclear power next for oil and the greatest for coal fired plants *The Political Cult of the Dead in Ukraine* Guido Hausmann, Iryna Sklokina, 2021-12-06 The Ukrainian Euromaidan in 2013/14 and the ongoing Russian Ukrainian war in the Eastern part of the country have posed new questions to historians The volume investigates the relevance of the cults of the fallen soldiers to Ukraine's national history and state It places the dead of the Euromaidan and the forms and functions of the emerging new cult of the dead in the context of older cults from pre Soviet Soviet and post Soviet times from various Ukrainian regions until the end of the presidency of Petro Poroshenko in 2019 The contributions emphasize the importance of the grassroots level of local and regional actors or memory entrepreneurs myths of state origin and national defense demanding unity and the dynamics of commemorative practices in the last thirty years in relation to pluralist and fragmented processes of nation and state building They contribute to new conceptualizations of the political cult of the dead On asking the right kind of question in

Möglichkeiten der Verwirklichung von Forschungs- und Versuchsergebnissen in der Konstruktion von Maschinen für die schälende Kohलगewinnung Bernhard Sann, 2013-03-14 The forces of the plough from the drive unit to the picks have been discussed Examples have been shown to reduce the forces of cutting and the unusable forces of friction to a minimum

Furthermore it was ensured that the plough remains in the horizon of the seam. An example shows that the production increases by enlarging the depth of the cut of 150 Ofo. By this the force of the cut can be reduced by 40 Ofo at the same time. Resume: Les forces provenant du rabot allant depuis la tête motrice jusqu'aux pieds ont été discutées. Il s'est trouvé des possibilités de réduire au minimum les forces de coupe et les forces inutiles forces de friction et par la même occasion de veiller à ce que la tenue du rabot dans l'horizont de couche soit assurée. Il est possible de prouver l'augmentation de la quantité productive grâce à un agrandissement de 150 % de la profondeur de coupe ce qui entraîne également une réduction d'environ 40 % de la force de traction au tourteau d'entraînement. Möglichkeiten der Verwirklichung von Forschungs- und Versuchsergebnissen in der Konstruktion von Maschinen für die schmelzende Kohलगewinnung. Von Lothar Freytag, Westfalen. Es ist mir eine besondere Freude in Ihrem Kreis ein Korreferat zu dem von Herrn Professor Sann behandelten Themenkreis halten zu dürfen. Die Behandlung des Blasensteins* Werner H. Hauss, 2013-04-17. Arteriosclerosis is a reactive disease of the vascular wall similar to inflammatory processes. It occurs in connection with a non-specific mesenchymal reaction. It is induced and maintained by a large number of non-specific factors which include the well-known risk factors. The sclerogenic factors attack the vascular wall cells which should be regarded as belonging to the mesenchymal system. The pathological reaction of the vascular wall cells is indispensable for the commencement of the sclerotic process. The changes in wall structure caused by the pathological mesenchymal reaction are decisive factors in the development of secondary pathological symptoms: lipidosis, fibrinosis, necrosis and thrombosis. Measures for the prevention of this condition must take account of the multiple causative factors. The disease is by no means caused solely by wrong eating habits; in particular the excess of fat in the diet, a large number of other factors play a part as has been demonstrated by animal studies. *Cyclische Peptide als Werkzeuge der molekularbiologischen Forschung. Grundlagen und Anwendungsmöglichkeiten von Chemilumineszenz, der Umwandlung von chemischer Energie in Licht* Theodor Wieland, 2013-03-09. The slowly acting amatoxins bind to the DNA-dependent nucleoplasmic RNA polymerase B II which is responsible for the transcription of mRNA. This enables one to discriminate between form B and polymerase A I, the enzyme catalyzing rRNA synthesis and to recognize all biological events depending on mRNA synthesis, protein synthesis after hormonal stimulation, growth of certain virus species etc. Also with the amatoxins is the affinity for the receptor dependent on the conformation visible by ORD and CD. All of the toxic derivatives are inhibitory whereas not all of the inhibitory ones are toxic. This discrepancy is in part resolved by the observation of nontoxic amanullins dissociating more than ten times faster from the enzyme than toxic ones. The quickly acting phallotoxins bind to a protein closely associated with the cytoplasmic membrane of the liver cell so causing the formation of microfilaments, the nature of which as actin has been proven by deco-

ration with heavy meromyosin Accordingly phallotoxins also bind to muscle actin which in presence of ADP and Mg immediately polymerizes to a phalloxin containing F actin Ph actin Ph actin is also formed from F actin by reaction with phallotoxins It differs from F actin by its resistance against 0.6 M KI Responsible for its toxic properties is the conformation of the molecule as can be followed by ORD and CD spectroscopy and the presence of a special methyl and hydroxyl group
