Subject Guide to Books in Print, 1991 **Lexical Facility** Michael Harrington, 2017-09-19 This book examines the simultaneous contribution of learner vocabulary size and speed to second language performance differences across learner levels and settings. Harrington considers vocabulary size and speed as reflected in retrieval speed and consistency as a three-dimensional measurement construct termed lexical facility. While size and retrieval speed are generally known, this is the first attempt to incorporate consistency as measured by the coefficient of variation as an index of vocabulary skill. Part 1 describes the three dimensions and the roles they play on lower level text.

processing and thus on second language performance more generally Part 2 reports on seven studies and related research that investigate the sensitivity of the three dimensions both individually and in combination to proficiency differences in common domains of academic English performance Harrington s framework and the theoretical and methodological issues that arise are presented in a manner accessible to a wide readership including second language acquisition vocabulary researchers testing and assessment practitioners and those interested in second language research methodology
