Texas Shrimpers Community Capitalism And The Sea:

Texas Shrimpers Robert Lee Maril, 1983 In interviews with fishhouse and dock workers boat owners and marine agents wives friends and neighbors of shrimpers and the shrimpers themselves Robert Lee Maril reveals the web of social and economic relationships that bind Texas shrimpers to their difficult and often dangerous work This book is about shrimping as an industry but it is also about the work the families the dreams and the frustrations of the men who catch the shrimp

The Bay Shrimpers of Texas Robert Lee Maril, 1995 To read this book is to spend a day on a 40 foot shrimp boat in a southern Texas bay then return home to an isolated port town whose economy revolves around shrimping and whose future is in jeopardy Often reading like a good novel Maril's political economy of the Texas shrimp industry is written by someone who knows the inner workings of the industry and the communities that depend upon it A rich and highly engaging study of the industry Contemporary Sociology

Values at Sea Dorinda G. Dallmeyer, 2003 The human impact on vast areas of the oceans remains relatively unregulated Sometimes in fact the only controls over our exploitation of marine resources lie in our environmental consciousness While the field of environmental ethics has explored rights and duties for land use stewardship and policy relatively little attention has been given to comparable issues of marine environments Values at Sea makes an important step toward moving environmental ethics discussions into a broader framework Gathered here are fifteen papers by an interdisciplinary group of scholars including ethicists marine scientists anthropologists economists geographers lawyers and activists From the Great Lakes to the Pacific Islands from the open sea to coastal areas the papers

cover a broad array of ethical issues and policy matters related to such topics as the valuation of marine life indigenous peoples knowledge and environmental stewardship endemic and exotic species aquaculture oil spills and species protection

Gulf Coast Soundings E. Paul Durrenberger, 1996 A fascinating study of the shrimp industry at the current time Adds both depth and breadth to our knowledge of maritime communities in the United States and beyond James Acheson author of *Lobster Gangs of Maine* A highly readable and long overdue critique of fisheries research and policy David Griffith author of *Jones s Minimal Low Wage Labor in the United States* *Marine Fisheries Review* , 2012 **Galveston** David G. McComb, 2010-01-01 A colorful history of the island city on Texas s Gulf Coast and its survival through times of piracy plague civil war and devastating natural disaster On the Gulf edge of Texas between land and sea stands Galveston Island Shaped continually by wind and water it is one of earth s ongoing creations where time is forever new Here on the shoreline embraced by the waves a person can still feel the heartbeat of nature And yet for all the idyllic possibilities Galveston s history has been anything but tranquil Across Galveston s sands have walked Indians pirates revolutionaries the richest men of nineteenth century Texas soldiers sailors bootleggers gamblers prostitutes physicians entertainers engineers and preservationists Major events in the island s past include hurricanes yellow fever smuggling vice the Civil War the building of a medical school and port raids by the Texas Rangers and always the struggle to live in a precarious location Galveston A History is an engrossing account that also explores the role of technology and the often contradictory relationship between technology and the city providing a guide to both Galveston history and the dynamics of urban development *Beyond Cannery Row* Carol Lynn McKibben, 2010-10-01 Presenting a nuanced story of women migration community industry and civic life at the turn of the twentieth century Carol Lynn McKibben s *Beyond Cannery Row* analyzes the processes of migration and settlement of Sicilian fishers from three villages in Western Sicily to Monterey California and sometimes back again McKibben s analysis of gender and gender roles shows that it was the women in this community who had the insight the power and the purpose to respond and even prosper amid changing economic conditions Vividly evoking the immigrants everyday experiences through first person accounts and detailed description McKibben demonstrates that the cannery work done by Sicilian immigrant women was crucial in terms of the identity formation and community development These changes allowed their families to survive the challenges of political conflicts over citizenship in World War II and intermarriage with outsiders throughout the migration experience The women formed voluntary associations and celebrated festas that effectively linked them with each other and with their home villages in Sicily Continuous migration created a strong sense of transnationalism among Sicilians in Monterey which has enabled them to continue as a viable ethnic community today

Trading Zones and Interactional Expertise Michael E. Gorman, 2010 A proposal for a new framework for fostering collaborations across disciplines addressing both theory and practical applications Cross disciplinary collaboration increasingly characterizes today s science and engineering research The problems and opportunities facing society do not

come neatly sorted by discipline Difficulties arise when researchers from disciplines as different as engineering and the humanities work together and find that they speak largely different languages This book explores a new framework for fostering collaborations among existing disciplines and expertise communities The framework unites two ideas to emerge from recent work in STS trading zones in which scientific subcultures each with its own language develop the equivalents of pidgin and creole and interactional expertise in which experts learn to use the language of another research community in ways that are indistinguishable from expert practitioners of that community A trading zone can gradually become a new area of expertise facilitated by interactional expertise and involving negotiations over boundary objects objects represented in different ways by different participants The volume describes applications of the framework to service science business strategy environmental management education and practical ethics One detailed case study focuses on attempts to create trading zones that would help prevent marine bycatch another investigates trading zones formed to market the female condom to women in Africa another describes how humanists embedded in a nanotechnology laboratory gained interactional expertise resulting in improved research results for both humanists and nanoscientists Contributors Brad Allenby Donna T Chen Harry Collins Robert Evans Erik Fisher Peter Galison Michael E Gorman Lynn Isabella Lekelia D Jenkins Mary Ann Leeper Roop L Mahajan Matthew M Mehalik Ann E Mills Bolko von Oetinger Elizabeth Powell Mary V Rorty Jeff Shrager Jim Spohrer Patricia H Werhane

Living Marine Resources Edwin S. Iversen, 2012-12-06 Living Marine Resources provides a thorough up to date introduction to all aspects of fisheries science This clearly written text offers insight into a topic of increasing importance the wise utilization and management of sea fisheries to maximize production without exceeding their carrying capacity Adoption of the approaches presented will improve the conservation and management of the many world fisheries that are suffering from years of inefficient practices The book is divided into five sections beginning with an introduction to the ocean environment and the various resource species Part two examines fisheries biology including age growth fecundity and mortality enabling readers to appreciate yield models designed to give estimates of maximum sustainable yield and maximum economic yield The third part covers gear methods and landings and includes material on the handling and processing of seafood as well as aquaculture In part four yield models are presented to introduce students to theories on population dynamics stock assessment and management The book concludes with coverage of recreational fisheries including socioeconomic importance catch and effort research

management techniques and their interface with commercial fisheries Living Marine Resources is an invaluable introduction to the subject for advanced undergraduate and graduate students of fisheries science In addition the material presented will be valuable to fishery and social scientists fishery officers and administrators and students in biology engineering economics and law

Jones's Minimal David Craig Griffith,1993-01-01 This book addresses the ways employers in American industries use race gender ethnicity and institutions of the state and the church to manipulate workers networks and communities and ultimately to control the supplies and characteristics of their labor Griffith focuses on the labor processes in the seafood and poultry processing industries paying particular attention to the growing use of new immigrant workers women and minority workers He traces relationships between capitalist expansion overseas in peasant and tribal societies and evolving labor practices of advanced capitalism in the United States As such his work offers a critique of conventional neoclassical economic approaches to the study of labor

The Question of the Commons Bonnie J. McCay,James M. Acheson,2022-04-19 This collection of eighteen original essays evaluates the use and misuse of common property resources taking as its starting point ecologist Garret Hardin s assertion in The Tragedy of the Commons that common property is doomed to overexploitation in any society This book represents the first cross cultural test of Hardin s argument and argues that while tragedies of the commons do occur under some circumstances local institutions have proven resilient and responsive to the problems of communal resource use

Doing Naturalistic Inquiry David A. Erlandson,1993-07-07 Based on the theoretical work of Lincoln and Guba this practical text is designed to help new researchers apply the constructivist paradigm The authors show how these ideas shape the practice of conducting alternative paradigm research Covering the research process from design through data collection analysis and presentation as well as important issues generally minimized in positivist research texts ethics trustworthiness and authenticity cases from a wide variety of disciplines demonstrate the efficacy of the methods described

Rise of Judicial Management in the U.S. District Court, Southern District of Texas, 1955-2000 Steven Harmon Wilson,2010-07-01 This is the first book length study of a federal district court to analyze the revolutionary changes in its mission structure policies and procedures over the past four decades As Steven Harmon Wilson chronicles the court s attempts to keep pace with an expanding diversifying caseload he situates those efforts within the social cultural and political expectations that have prompted the increase in judicial seats from four in 1955 to the current nineteen Federal judges have progressed from being simply referees of legal disputes to managers of expanding courts dockets and staffs says Wilson The Southern District of Texas offers an especially instructive model by which to study this transformation Not only does it contain a varied population of Hispanics African Americans and whites but its jurisdiction includes an international border and some of the busiest seaports in the United States Wilson identifies three areas of judicial management in which the shift has most clearly manifested itself Through docket and case management judges have attempted to rationalize the flow of work through the litigation process Lastly and most controversially judges have sought to

bring constitutionally flawed institutions into compliance through structural reform rulings in areas such as housing education employment and voting Wilson draws on sources ranging from judicial biography and oral history interviews to case files published opinions and administrative memoranda Blending legal history with social science this important new study ponders the changing meaning of federal judgeship as it shows how judicial management has both helped and hindered the resolution of legal conflicts and the protection of civil rights From Sail to Steam Richard V. Francaviglia, 2010-06-28 The story of the ships mariners and ports that formed a vital connection between Texas and the rest of the world A first stop reference The Journal of American History Second Place Presidio La Bahia Award Sons of the Republic of Texas The Gulf Coast has been a principal place of entry into Texas ever since Alonso Alvarez de Pineda explored these shores in 1519 Yet nearly five hundred years later the maritime history of Texas remains largely untold In this book Richard V Francaviglia offers a comprehensive overview of Texas merchant and military marine history drawn from his own extensive collection of maritime history materials as well as from research in libraries and museums around the country Based on recent discoveries in nautical archaeology Francaviglia tells the stories of the Spanish flotilla that wrecked off Padre Island in 1554 and of La Salle s flagship Belle which sank in 1687 He explores the role of the Texas Navy in the Texas Revolution of 1835 1836 and during the years of the Texas Republic and also describes the Civil War battles at Galveston and Sabine Pass Finally he recounts major developments of the nineteenth century concluding with the disastrous Galveston Hurricane in 1900 More than one hundred illustrations many never before published complement the text Although there have been many excellent and valuable books published previously on specific topics in Texas maritime development e g the Texas Navy river trade the Civil War etc we have been waiting a long time for a single volume that ties all those loose threads together into a single cohesive whole Andrew W Hall specialist in Texas marine history and archaeology *The Vietnamese Experience in America* Paul Rutledge, 1992 *Accessions List* United States.
