**Places are shaped by indigenous factors**

All places have a unique character which is formed by their many different characteristics. These factors can be traced to indigenous and indigenous.

**Indigenism** – the internal factors which shape a place's character. These could be physical, e.g. the location, topography and physical geography, or they could be human, e.g. the land use, built environment, infrastructure and demographic and economic characteristics.

**Discussion** - What are the physical factors that shape the character of a place?

**Exam question practice**

**Outline the concept of a place (4 marks)**

A place is defined as location plus meaning.

- Each place has a different meaning to different people and is therefore highly personal, experiential and subjective. A sense of place then, refers to those meanings which are associated with a place.
- Place can be applied to any scale, from a particular room in a building to a country or region, which evokes shared feelings in people.
- Place does not necessarily have to be a fixed location spatially or temporally, being a place is a product of its history – formal and personal – and a timeless ability to engender feelings of attachment based on subjective memories or distant historical events which are represented in architecture and geography.
- Places are dynamic and subject to constant change in their material structure and meaning. Places are not isolated or cut off from outside influences and as a people, places and objects join in and out of a place in space and time they change it. They are therefore changing places.

**How are places represented?**

**1. Maps/Geography** - Maps can be used to show any sort of data that has a location, e.g. they can show where physical features are. They can also show quantitative demographic and economic data, e.g. different levels of income by location. Some maps can also show qualitative information, such as maps of values that show levels of happiness – these may be more helpful than quantitative maps for information about sense of place.

Benefits	Issues
Maps are simply representations of a place that display the located characteristics of it.	Can carry bias such as distortions, areas. You need to be analytical and critical when using maps as sources as they can misrepresent reality. The London Tube map is a classic example.
Maps give us reliable information about how a place has changed.	Maps in the past were often hand drawn and therefore open to subjectivity.
Maps can be used to show any sort of data that has a location, e.g. they can show where physical features are.	Finally, maps are not always updated that frequently.
