Text And Context:

Texts and Contexts Adrian Beard, 2001 The idea of studying texts in context has become a new emphasis in literary studies This book explores the idea of contexts and the way they affect texts concentrating upon the writer's context the reader's context the text's context the language context and the meaning context **Text, Context, Pretext** H. G. Widdowson, 2008-04-15 Written by a leading researcher in the field this fascinating examination of the relations between grammar text and discourse is designed to provoke critical discussion on key issues in discourse analysis which are not always clearly identified and examined Written by a leading researcher in the field Continues the enquiry into discourse analysis that Zellig Harris initiated 50 years ago which raised a number of problematic issues that have remained unresolved ever since Introduces the notion of pretext as an additional factor in the general interpretative process Focuses attention specifically on the work of critical discourse analysis CDA in light of the issues discussed *Text and Context in Functional Linguistics* Mohsen Ghadessy, 1999-06-15 The shift towards a sociolinguistic approach to the analysis of language in the last few decades has necessitated new definitions for a number of concepts that linguists have taken for granted for a long time This volume attempts to demystify the important notions of text and context by providing clear definitions and examples within the assumptions of Systemic Functional SF linguistics After a discussion of the role and significance of context by three eminent SF linguists in section one the influence of context on text is dealt with in section two From Context to Language Section three From Language to Context considers textual features and their relationship to contextual factors All the contributors base their analyses on data collected from a variety of spoken and written registers of contemporary English Making Sense of Text Linda Gerot, 1998 *Language, Text and Context* Michael Toolan, 2016-11-18 First published in 1992 this wide ranging collection of essays focuses on the principle of contextualisation as it applies to the interpretation description theorising and reading of literary and non literary texts The collection aims to reveal the interdependencies between theory analysis text and context by challenging the myth that stylistics entails a fundamental separation of text from context linguistic description from descriptive interpretation or language from situation The essays cover a historically diverse set of texts from Puttenham to Colemanballs and a number of language sensitive topics such as post modernism irony newspaper representations gender and narrative Text, Context and Construction of Identity Rajesh Kumar, Om Prakash, 2019-04-30 Language is central to our existence and it happens to be the most sophisticated product of the human mind It is inconceivable to think of ourselves our societies our ideas cultures or identities without language It is the primary means of socialization and whatever we know is a result of it It is the primary medium of construction and dissemination of knowledge and structures our thought processes in important ways that constitute our identity In very complex ways it interacts with the social political and economic power structures that remain significant in defining the identities of individuals and societies The essays in this volume create an awareness and understanding about the role of linguistic

context in negotiating identity The book explains identity and the complex relations between language and several aspects of our society It explores identity through text and context and will serve to trigger a novel discourse around the centrality of identity in contemporary society **Text, Context and the Johannine Community** David A. Lamb, 2014-04-24 Text

Context and the Johannine Community adopts a new approach to the social context of the Johannine writings by drawing on modern sociolinguistic theory Sociolinguistics emphasizes language as a social phenomenon which can be analysed with reference not only to its broad context of culture but also through the use of register analysis to its narrower context of situation The Johannine writings have increasingly been seen as the product of a distinct Johannine Community depicted by some scholars as a sectarian group opposed both to wider Jewish society and to other Christian groups This model has largely been constructed on historical critical grounds yet given our lack of reliable external information about the origin of the Johannine writings a more fruitful approach may be to examine their lexico grammatical and discourse features to determine what these imply about interpersonal relationships This study compares selected narrative asides from the Gospel of John with a passage section from 1 John and with the two shorter Johannine Epistles It concludes that register analysis of these texts does not support the idea of a close knit sectarian group **Text, Context, Concepts** Cornelia

Zelinsky-Wibbelt, 2011-05-02 The common aim of the contributions to this volume is to shed light on the communication of conceptual structures The papers investigate how speakers rely on the same cognitive dispositions in three different areas of transfer in the lexicalization of metonymies and metaphors in intercultural communication and in expert lay communication

affect a text Methods of Text and Discourse Analysis Stefan Titscher, Bryan Jenner, 2000-07-28 This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistic approaches to text and discourse Its main merit I think is that it introduces approaches which up to now have hardly been admitted into the universe of scientific discourse Discourse Studies Methods of Text and Discourse Analysis provides the most comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis Among the 10 linguistic and sociological models surveyed in this book some of the more important are Grounded Theory Content Analysis Conversation Analysis and Critical Discourse Analysis The book presents each approach according to a standardised format which allows for direct systematic comparisons The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods Interdisciplinary and international in its aims Methods of Text and Discourse Analysis suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each others methods and procedures
