Text Discourse And Context:

Text and Context Teun A. van Dijk, 1977 **Text, Context, Pretext** H. G. Widdowson, 2008-04-15 Written by a leading researcher in the field this fascinating examination of the relations between grammar text and discourse is designed to provoke critical discussion on key issues in discourse analysis which are not always clearly identified and examined Written by a leading researcher in the field Continues the enquiry into discourse analysis that Zellig Harris initiated 50 years ago which raised a number of problematic issues that have remained unresolved ever since Introduces the notion of pretext as an additional factor in the general interpretative process Focuses attention specifically on the work of critical discourse analysis CDA in light of the issues discussed *Linguistic Semantics* John Lyons, 1995-11-30 This successor to *Language Meaning and Context* provides an invaluable introduction to linguistic semantics *Society and Discourse* Teun A. van Dijk, 2009-01-22 The theory is applied to the domain of politics including the debate about the war in Iraq where political leaders speeches serve as a case study for detailed contextual analysis BOOK JACKET *Text, Time, and Context* Richard P. Meier, Helen Aristar-Dry, Emilie Destruel, 2009-10-20 Carlota S Smith was a key figure in linguistic research and a pioneering woman in generative linguistics This selection of papers focuses on the research into tense aspect and discourse that Smith completed while Professor of Linguistics at the University of Texas at Austin Smith s early work in English syntax is still cited today and her early career also yielded key research on language acquisition by young children Starting in the mid 1970s after her move to UT she embarked on her most important line of research In numerous papers the first of which was published in 1975 and in a very important 1991 book *The Parameter of Aspect* Smith analyzed how languages encode time and how they encode the ways events and situations occur over time Smith s work on the expression of time in language is notable because of its careful analyses of a number of quite different languages including not only English and French but also Russian Mandarin and Navajo Inspired by a year in France in the early 1970s Smith began to analyze the differing ways in which languages encode time and how they encode the ways events and situations occur over time In doing so she developed her signature two component theory of aspect This model of temporal aspect provided an excellent framework for graduate students seeking to analyze the temporal systems of an array of languages including under described languages that are so much the focus of research in UT s Linguistics Department Selected by Carlota Smith herself and by her longtime friends and colleagues this book contains her 1980 piece on temporal structures in discourse her 1986 comparison of the English and French aspectual systems a 1996 paper on the aspect system in Navajo an increasingly endangered language which Smith worked to preserve and her 1980 and 1993 papers on the child s acquisition of tense and aspect Smith who died in 2007 was a trailblazer in her field whose broad interests fed into her scholarly research She was an avid reader who sought to bring the analytic tools of linguistics to the humanistic study of literature by examining the syntactic and pragmatic principles which underlie literary effects Her research on rhetorical and temporal effects in context was integrated into her

last book *Modes of Discourse* 2003 The current volume of articles covers much of her most fruitful work on the way in which language is used to express time and will be essential reading for many working and studying in linguistics generally and in semantics particularly *Rethinking Language, Text and Context* Ruth Page, Beatrix Busse, Nina Nørgaard, 2018-08-14 This collection of original research highlights the legacy of Michael Toolan's pioneering contributions to the field of stylistics and in so doing provides a critical overview of the ways in which language text and context are analyzed in the field and its related disciplines Featuring work from an international range of contributors the book illustrates how the field of stylistics has evolved in the 25 years since the publication of Toolan's seminal *Language Text and Context* which laid the foundation for the analysis of the language and style in literary texts The volume demonstrates how technological innovations and the development of new interdisciplinary methodologies including those from corpus cognitive and multimodal stylistics point to the greater degree of interplay between language text and context exemplified in current research and how this dynamic relationship can be understood by featuring examples from a variety of texts and media Underscoring the significance of Michael Toolan's extensive work in the field in the evolution of literary linguistic research this volume is key reading for students and researchers in stylistics discourse studies corpus linguistics and interdisciplinary literary studies *Language, Text and Context* Michael Toolan, 2016-11-18 First published in 1992 this wide ranging collection of essays focuses on the principle of contextualisation as it applies to the interpretation description theorising and reading of literary and non literary texts The collection aims to reveal the interdependencies between theory analysis text and context by challenging the myth that stylistics entails a fundamental separation of text from context linguistic description from descriptive interpretation or language from situation The essays cover a historically diverse set of texts from Puttenham to Colemanballs and a number of language sensitive topics such as post modernism irony newspaper representations gender and narrative **Text Analysis and Representation** Ian Cushing, 2018-01-25 Essential study guides for the future linguist *Text Analysis and Representation* is a general introduction to the methods and principles behind English linguistics study suitable for students at advanced level and beyond Written with input from the Cambridge English Corpus it looks at the way meaning is made using authentic written and spoken examples This helps students give confident analysis and articulate responses Using short activities to help explain analysis methods this book guides students through major modern issues and concepts It summarises key concerns and modern findings while providing inspiration for language investigations and non examined assessments NEAs with research suggestions **Discourse and Context** Teun A. van Dijk, 2008-07-31 How do social situations influence language use discourse and conversation This book is a monograph which presents a multidisciplinary theory of context and the way context influences language use and discourse Unlike in earlier approaches contexts are not defined as objective social variables such as gender or age Rather they are constructs of the participants themselves that is subjective definitions of the communicative situation that are made explicit in the sociocognitive notion of context models These models

dynamically control all language use make sure that discourses are appropriate in the communicative situation and hence are the basis of pragmatics In this book context models are studied especially from a socio linguistic and cognitive perspective In another book published by Cambridge University Press Society and Discourse Teun A van Dijk develops the social psychological sociological and anthropological dimensions of the theory of context **Modeling and Using Context**

Patrick Brézillon,Roy Turner,Carlo Penco,2017-06-06 This book constitutes the proceedings of the 10th International and Interdisciplinary Conference on Modeling and Using Context CONTEXT 2017 held in Paris France in June 2017 The 26 full papers and 15 short papers presented were carefully reviewed and selected from 88 submissions The papers feature research in a wide range of disciplines related to issues of context and contextual knowledge and discuss commonalities across and differences between the disciplines approaches to the study of context They are organized in the following topical sections context in representation context modeling of human activities context in communication context awareness and various specific topics **Contrastive Analysis of News Text Types in Russian, British and American Business**

Online and Print Media Anastasiya Kornetzki,2012-03-01 This book is devoted to the analysis of cross media and cross cultural peculiarities of Russian British and American media discourse from the intertextual perspective The study of a complex variety of intertextual links which exist between texts and genres is a contemporary aspect in the theory of intertextuality There are numerous theoretical approaches in the study of intertextuality but there is a lack of an empirically profound framework for its analysis across many disciplines An interdisciplinary approach to the study of intertextuality is a necessary step to investigate this phenomenon comprehensively This book offers an alternative approach to the study of intertextuality singling out intra textual textual and inter genre levels on which this phenomenon comes to the fore

Domains and Directions in the Development of TBLT Martin Bygate,2015-11-15 This volume brings together contemporary position statements and research reviews which were originally presented as Plenary Addresses to the Biennial International Conference on Task Based Language Teaching between 2005 and 2013 It thus assembles up to date reflections critiques and recommendations from influential researchers working within the TBLT paradigm over the last 30 years thereby also highlighting most of the major theoretical perspectives so far developed While the plenarists structured their chapters around their original presentations they have been invited to update their thinking as they feel appropriate and in response to recent developments in the field The collection thus offers representative and accessible coverage of a range of approaches to the overall philosophy of TBLT to the relationship between TBLT and the study of second language acquisition and to the development and implementation of TBLT as a comprehensive approach to language education curriculum and pedagogy **Theory and Practice of Early Reading** L. B. Resnick,P. A. Weaver,2013-12-16 First

Denhiere, J.P. Rossi, 1991-06-17 The book presents the state of the art in major aspects of text analysis and cognitive text processing by some of the most well known European and American researchers in the field of text linguistics and cognitive psychology Comprehensive views and new perspectives are proposed in the following topics cognitive and metacognitive aspects of text processing structures and processes involved in the construction of multi level semantic representations in relation with text and reader characteristics achievement of local and global coherence of meaning during reading and comprehension assessment of knowledge knowledge acquisition of concepts and complex systems by text and cognitive and metacognitive aspects of text production **Models of Understanding Text** Bruce K. Britton, Arthur C. Graesser, 2014-02-25 What is text understanding It is the dynamic process of constructing coherent representations and inferences at multiple levels of text and context within the bottleneck of a limited capacity working memory The field of text and discourse has advanced to the point where researchers have developed sophisticated models of comprehension and identified the particular assumptions that underlie comprehension mechanisms in precise analytical or mathematical detail The models offer a priori predictions about thought and behavior not merely ad hoc descriptions of data

Indeed the field has evolved to a mature science The contributors to this volume collectively cover the major models of comprehension in the field of text and discourse Other books are either narrow covering only a single theoretical framework or do not focus on systematic modeling efforts In addition this book focuses on deep levels of understanding rather than language codes syntax and other shallower levels of text analysis As such it provides readers with up to date information on current psychological models specified in quantitative or analytical detail *The Interface between Scientific and Technical Translation Studies and Cognitive Linguistics* Ralph Krüger, 2015-04-17 Scientific and Technical Translation STT is a highly complex and knowledge intensive field of translation and cognitive linguistics is a usage based linguistic framework which provides powerful theoretical tools for modelling knowledge organisation and representation in discourse This book explores the interface between scientific and technical translation studies and cognitive linguistics by discussing the epistemological contextual textual and cross linguistic dimensions of scientific and technical translation from a cognitive linguistic perspective Particular emphasis is placed on explicitation and implicitation as indicators of the interaction between text and context in STT The corpusbased investigation of the two phenomena illustrates the complex knowledge requirements pertaining to scientific and technical translation and demonstrates the explanatory power of cognitive linguistics with regard to important textual and contextual aspects of STT
