The Handbook Of National Population Censuses:

The Handbook of National Population Censuses Doreen S. Goyer, Gera E. Draaijer, 1992-04-30 The third volume in a three volume set this work is designed to take the difficulty out of doing research using census data In alphabetically arranged chapters it provides coverage of the contents of the censuses taken in the European states and territories

The Handbook of National Population Censuses Eliane Domschke, Doreen S. Goyer, 1986-12-17 This is the second volume of a projected three volume set that will document the definitions concepts trends and contents of population censuses throughout the entire world This systematic and up to date handbook is unique in its scope and will open up a rather rare body of research literature to scholars in any field related to population The editors have organized the vast amount of information in an easily accessible format grouping countries and territories by world regions and including current maps for almost all of them Unlike previous works on censuses this handbook provides an expanded historical view of the countries which will be of great help in understanding census methods frequency and coverage

The handbook of national population censuses : Latin America and the Caribbean, North America, and Oceania Doreen S. Goyer, Eliane Domschke, 1983

Research Guide to the Russian and Soviet Censuses Ralph S. Clem, 2016-11-01 Taken together the Russian census of 1897 and the Soviet censuses of 1926 1959 1970 and 1979 constitute the largest collection of empirical data available on that country but until the publication of this book in 1986 the daunting complexity of that material prevented Western scholars from exploiting the censuses fully This book is both a guide to the use of and a detailed index to these censuses The first part of the book consists of eight essays by specialist on the USSR six of them dealing with the use of census materials and the availability of data for research on ethnicity and language marriage and the family education and literacy migration and organization age structure and occupations The second part a comprehensive index for all the published census presents more than six hundred annotated entries for the census tables a keyword index that enables researchers to find census data by subject and a list of political administrative units covered in each census

The Routledge Handbook of African Demography Clifford O. Odimegwu, Yemi Adewoyin, 2022-02-07 This handbook provides an authoritative and comprehensive overview of African population dynamics variations causes and consequences demonstrating the real world applications of research in policies and programmes African demography has come of age Over 50 years the discipline has grown exponentially in the number of training and research institutions specialist experts and academic output all with an aim of addressing the enormous demographic challenges faced by the continent The book draws on old and emerging analytical tools to explore the relationships between population dynamics and social economic cultural and political environments from African perspectives Key topics include fertility sexual behaviours healthcare ageing mortality migration displacement the causes and consequences of demographic changes and teaching and research developments in African demography The Routledge Handbook of African Demography will be an essential resource for

students and researchers of African demography sociology development and cultural studies

Censuses and Census Takers Gunnar Thorvaldsen, 2017-11-13 This book analyses the international development of the census by comparing the history of census taking on all continents and in many countries The timeframe is wide from male censuses in the Bible to current censuses covering the whole population There is a focus on the efforts and destinies of census takers and the development of methods used to collect information into the census questionnaires The book highlights international cooperation in census taking as well as how computerized access to census data facilitates genealogical studies and statistical research on both historical and contemporary societies It deals with such questions as Why did the French and British gentry block efforts at census taking in the 18th century What role did German censuses play during Holocaust Why were the Soviet census directors executed as part of the Moscow processes Why did US states sue the Census Bureau in the 1970s How do wars and revolutions affect census taking The text ends by discussing whether the days of the population census as we know it are numbered since countries exceedingly construct censuses by combining information from population registers rather than with questionnaires

The Methods and Materials of Demography Henry S. Shryock, Jacob S. Siegel, Elizabeth A. Larmon, 1973

Map Guide to the U.S. Federal Censuses, 1790-1920 William Thorndale, William Dollarhide, 1987 Genealogical research in U.S. censuses begins with identifying correct county jurisdictions to assist in this identification the map Guide shows all U.S. county boundaries from 1790 to 1920 On each of the nearly 400 maps the old county lines are superimposed over the modern ones to highlight the boundary changes at ten year intervals Accompanying each map are explanations of boundary changes notes about the census locality finding keys In addition there are inset maps which clarify territorial lines a state by state bibliography of sources an appendix outlining pitfalls in mapping county boundaries Finally there is an index which lists all present day counties plus nearly all defunct counties or counties later renamed the most complete list of American counties ever published

Reference Guide to Africa Alfred Kagan, Atoma Batoma, 2014-10-16 This third edition of the Reference Guide to Africa explains the most important resources for the study of the continent of Africa It contains a general sources section and a larger disciplinary oriented section All sources are annotated A new edition is sorely needed since the last edition was published nine years ago The previous

editions have been successfully used in research libraries worldwide since 1999 and it has been used to teach several African studies research courses The book provides an orientation for researching almost any topic in the arts humanities and social sciences concerning the continent of Africa and all of its countries and ethnic groups The first part explains and lists portals databases bibliographies indexes guides encyclopedias country sources biography primary sources government publications and statistics The second part presents 16 subject oriented chapters mostly in the arts humanities and social sciences from agriculture and food security to women studies It covers sources that broadly cover the continent or in some cases only North Africa and the Middle East It generally excludes sources limited to one country or region of Africa except for North Africa because of the nature of the literature One third of the sources in this edition are new and nearly half of them are available in electronic format There are author title and subject indexes This unique work is intended for students teachers librarians and researchers It likely will be used most by reference librarians and teachers for students in high school through graduate studies It will also be used independently by undergraduate and graduate students It can be used to answer simple reference questions provide the resources for an undergraduate paper or for comprehensive work by advanced students and researchers The Methods and Materials of Demography Henry S. Shryock, 2013-10-22 Like the original two volume work this work attempts to present a systematic and comprehensive exposition with illustrations of the methods used by technicians and research workers in dealing with demographic data The book is concerned with how data on population are gathered classified and treated to produce tabulations and various summarizing measures that reveal the significant aspects of the composition and dynamics of populations It sets forth the sources limitations underlying definitions and bases of classification as well as the techniques and methods that have been developed for summarizing and analyzing the data

National Colors Mara Loveman,2014-06-06

The era of official color blindness in Latin America has come to an end For the first time in decades nearly every state in Latin America now asks their citizens to identify their race or ethnicity on the national census Most observers approvingly highlight the historic novelty of these reforms but National Colors shows that official racial classification of citizens has a long history in Latin America Through a comprehensive analysis of the politics and practice of official ethnoracial classification in the censuses of nineteen Latin American states across nearly two centuries this book explains why most Latin American states classified their citizens by race on early national censuses why they stopped the practice of official racial classification around mid twentieth century and why they reintroduced ethnoracial classification on national censuses at the dawn of the twenty first century Beyond domestic political struggles the analysis reveals that the ways that Latin American states classified their populations from the mid nineteenth century onward responded to changes in international criteria for how to construct a modern nation and promote national development As prevailing international understandings of what made a political and cultural community a modern nation changed so too did the ways that Latin American census officials depicted diversity within national populations The way census officials described populations in official statistics in turn shaped how policymakers

viewed national populations and informed their prescriptions for national development with consequences that still reverberate in contemporary political struggles for recognition rights and redress for ethnoracially marginalized populations in today's Latin America *Census Publications, Catalog and Subject Guide* ,1967 *Woman's World County Hand Book on National Distribution* ,1923 The first Hand Book gave to the American manufacturer business maps of every state with all political references removed the number of retail and wholesale merchants in eight leading lines in every town of over 1 000 population showing its location and importance and the buying radii for the different sized places On the maps the buying centers from 1 000 to 2 500 were printed in red 2 500 to 25 000 in green and over 25 000 were printed in black Page 3
