The Harvey Lectures 1978 1979 Series 74:

Aaron Klug - A Long Way from Durban Kenneth C. Holmes, 2017-02-09 The life and work of Aaron Klug Nobel prize winner and one of the pioneers of structural molecular biology *Physiology Or Medicine* Jan Lindsten, 1992 The quality of life for millions of people all over the globe has been improved by the work of diligent biologists and doctors working in the many branches of life science An improved knowledge of how the body functions at the genetic cellular physiological and behavioural levels and a greater understanding of disease and pharmacology have resulted in a reduction in human suffering The way is being paved for the effective treatment of some of the greatest health problems of the late twentieth century cancer AIDS and diseases caused by parasites These two volumes are collections of the Nobel Lectures delivered by the laureates together with their biographies portraits and the presentation speeches for the periods 1971 1980 and 1981 1990 respectively Each Nobel Lecture is based on the work for which the laureate was awarded the prize New biographical data of the laureate are also included These volumes of inspiring lectures by outstanding scientists should be on the bookshelf of every keen student teacher and professor of biological and medical sciences as well as of those in related fields During the period 1971 1980 important areas of research being recognized were as diverse as hormone action and radioimmunoassays infectious diseases molecular genetics immunology computerized tomography and social behaviour The laureates according to the specific year are 1971 E W SUTHERLAND JR for his discoveries concerning the mechanisms of the action of hormones 1972 G M EDELMAN 1973 K VON FRISCH K LORENZ 1974 A CLAUDE C DE DUVE 1975 D BALTIMORE R DULBECCO 1976 B S BLUMBERG 1977 R GUILLEMIN and R S YALOW for the development of radioimmunoassays of peptide hormones 1978 W ARBER D NATHANS 1979 A M CORMACK 1980 B BENACERRAF J DAUSSET G D SNELL for their discoveries concerning genetically determined structures on the cell surface that regulate immunological reactions *Surgery of the Biliary Tract* Bjorn Thorbjarnarson, 1982 *Sources of Consciousness* H. S. Green, Terry Triffet, 1997 The phenomenon of consciousness has long been one of the great mysteries of life perhaps because it is inexplicable in terms of the deterministic theories of classical science Today there is some consensus that the key to the understanding of the workings of the mind should be sought in the area of indeterministic quantum mechanics but until recently there has been little substantial progress in unravelling the mystery This book is the culmination of several decades of research by the authors in the physical sciences neurosciences and computer sciences with comprehensive summaries and references to related work by many other scientists and presents important advances toward solving the problem Written for the most part in plain language but supported by appropriate symbolism the book is truly interdisciplinary designed for the needs of a wide variety of students and scholars *Subject Catalog, 1979* Library of Congress, 1979 **Biochemistry of Differentiation and Morphogenesis** L. Jaenicke, 2012-12-06 The topic of this Mosbach Colloquium was meant as a question to begin with When I started to study differentiation and morphogenesis in *Volvox* I hoped for a straightforward answer along prepared groove

only to find out that also here things follow Murphy's Law they were much more complicated than expected Succour had to be sought Thus the idea arose to put this question before a board of experts Experience would have warned any ex service man never to utter an idea or else you would be made responsible and it came as it had to come I was made impressario of this gremium I had to assemble the experts These Proceedings contain their expertise I cannot even say that I biased it by my picking In the beginning I aimed at setting different accents by inclination and force of habit Then by trial and error by advice and declination the programme shaped itself It eventually gained momentum of which also the size of this volume is indicative In this volume are printed all the papers presented with two regretted exceptions but not the sometimes lively discussion which clarified and pruned here and there It would just have made the size too unwieldy Differentiation and morphogenesis start with the expression of genes The development programme reels off the genome and is regulated by the position of the appropriate genes Their structure is in the focus of gene biochemistry since the decisive tools have become available
