The Head:

The Head and Neck Roger Kerry, Barbara Cagnie, 2025-11-03 Musculoskeletal neck and head pain is one of the highest health burdens faced globally. Management of people with this pain is complex, multi-factorial and challenging. Scientific evidence continues to grow in this area but can often be confusing or contradictory. This multi-contributed compendium is a much-needed resource for all healthcare professionals, researchers and educators treating neck and head dysfunction. Taking a holistic and patient-centred approach, this vital interdisciplinary book discusses the background of these dysfunctions and reviews specific conditions of the neck and head. It also includes evidence-based clinical assessment and management, clinical reasoning and is supplemented with patient stories and supporting resources. [A Hole in the Head](#) Charles G.

Gross, 2012-01-13 Essays on great figures and important issues, advances and blind alleys from trepanation to the discovery of grandmother cells in the history of brain sciences. Neuroscientist Charles Gross has been interested in the history of his field since his days as an undergraduate. *A Hole in the Head* is the second collection of essays in which he illuminates the study of the brain with fascinating episodes from the past. This volume's tales range from the history of trepanation (drilling a hole in the skull) to neurosurgery as painted by Hieronymus Bosch to the discovery that bats navigate using echolocation. The emphasis is on blind alleys and errors as well as triumphs and discoveries with ancient practices connected to recent developments and controversies. Gross first reaches back into the beginnings of neuroscience then takes up the interaction of art and neuroscience, exploring among other things Rembrandt's *Anatomy Lesson* paintings and finally examines discoveries by scientists whose work was scorned in their own time but proven correct in later eras.
