Salomon, 2015-06-23 The great Renaissance artist Andrea del Sarto 1486 1530 rivals Leonardo da Vinci as one

of history's most accomplished draftsmen. Moving beyond the graceful elegance of his contemporaries such as Raphael and Fra Bartolommeo, he brought unprecedented realism to his drawings through the rough and rustic use of chalk in his powerfully rendered life and compositional studies. With an immediacy few other Renaissance artists possess, del Sarto's work has proven to be inspirational and compelling to later audiences with admirers such as Degas and Redon. This lavishly illustrated book reveals del Sarto's dazzling inventiveness and creative process, presenting fifty core drawings on paper together with a handful of paintings. The first publication to look to del Sarto's working practice through a close examination of his art from across all the world's major collections, this volume analyzes new studies of his panel underdrawings as well. The depth and breadth of its research make this book an important contribution to the study of del Sarto and Florentine Renaissance workshop practice. This volume is published to accompany an exhibition on view at the J. Paul Getty Museum from June 23 through September 13, 2015, and at the Frick Collection in New York from October 6, 2015, through January 10, 2016. **Sixteenth-century Central Italian Drawings** Szépművészeti Múzeum (Hungary), Loránd Zentai, 1998

Michelangelo, Selected Scholarship in English: The Sistine Chapel William E. Wallace, 1995. Accessible to readers useful to specialists. Much as has been written on Michelangelo. By 1970 the number of scholarly books and articles exceeded 4,000, approximately a tenth in English. In the past 25 years the literature has grown exponentially, with a notable increase in English language publications. The five-volume series reproduces some 100 articles in English selected from a broad range of books and journals. The collection is both accessible to the general reader and useful to the specialist, offering a representative sample of old and new commentary on the artist and his work. The career of a genius. Articles are arranged chronologically, with separate volumes covering the artist's early life and works, the Sistine Chapel ceiling commission associated with San Lorenzo, the tomb of Julius II, and other Roman projects, and a final volume devoted to drawings, poetry, and miscellaneous studies. Spanning his entire 89-year life, the articles explore Michelangelo's prodigious creativity as an artist, thinker, and poet. The sheer quantity of what has been written on Michelangelo can be intimidating; most students have little sense of how to approach or effectively utilize the vast literature. By presenting a varied introduction to a great artist, this collection is a handy reference tool for a wide array of topics, problems, and literature. **The Sculptures of Andrea**

Del Verrocchio Andrew Butterfield, Andrea Del Verrocchio, 1997-01-01. Andrea del Verrocchio was the preeminent sculptor in late fifteenth-century Florence and one of the leading artists in Renaissance Europe. In every genre of statuary, Verrocchio made formal and conceptual contributions of the greatest significance, and many of his sculptures, such as the Christ and St. Thomas and the Colleoni Monument, are among the masterpieces of Renaissance art. A favorite artist of Lorenzo de' Medici and the teacher of Leonardo da Vinci, Verrocchio was a key link between the innovations of the fifteenth century and the creations of the High Renaissance. This beautiful catalogue raisonné is the first comprehensive and detailed study of Verrocchio's extraordinary and innovative sculptures. Andrew Butterfield has combined careful visual analysis of the

sculptures with groundbreaking research into their function iconography and historical context In order to explain Verrocchio s contributions to the different genres of Renaissance sculpture Butterfield provides new and important information on a broad range of issues such as the typology and social history of Florentine tombs the theoretical problems in the production of perspectival reliefs and the origins of the Figura serpentinata Furthermore Butterfield draws on a spectrum of often overlooked texts to elucidate fundamental iconographical problems for example the significance of David in quattrocento Florence In its scope depth and clarity The Sculptures of Andrea del Verrocchio will rank as one of the finest studies of an Italian sculptor ever published
