Prince of Sparta Jerry Pournelle, S. M. Stirling, 1993-03-01 THE HELOT WAR PART II Together the new Royal Spartan Army and its instructors the 5th Battalion of Falkenberg's Mercenary Legion have defeated the initial assault of Grand Senator Bronson's terrorist hordes and their techno ninja allies But Bronson's hatred of Sparta and the Legion was as strong as ever thanks to his limitless wealth and high office the Helots were able to reform retreat and fight again This time they are doing better Besieged within blockaded by the CoDominium without Sparta grimly fights to preserve its precious experiment in liberty But just as it seems that the Spartans and their allies might prevail Bronson has supplied his minions with a battle plan that will bring something worse than a Helot victory Codename Endlosung Final Solution At the publisher's request this title is sold without DRM Digital Rights Management

Invasion Biology Mark A. Davis, 2009-01-29 With the exception of climate change biological invasions have probably received more attention during the past ten years than any other ecological topic Yet this is the first synthetic single authored overview of the field since Williamson's 1996 book Written fifty years after the publication of Elton's pioneering monograph on the subject Invasion Biology provides a comprehensive and up to date review of the science of biological invasions while also offering new insights and perspectives relating to the processes of introduction establishment and spread The book connects science with application by describing the health economic and ecological impacts of invasive species as well as the variety of management strategies developed to mitigate harmful impacts The author critically evaluates the approaches findings and controversies that have characterized invasion biology in recent years and suggests a variety of future research directions Carefully balanced to avoid distinct

taxonomic ecosystem and geographic both investigator and species biases the book addresses a wide range of invasive species including protists invertebrates vertebrates fungi and plants which have been studied in marine freshwater and terrestrial environments throughout the world by investigators equally diverse in their origins This accessible and thought provoking text will be of particular interest to graduate level students and established researchers in the fields of invasion biology community ecology conservation biology and restoration ecology It will also be of value and use to land managers policy makers and other professionals charged with controlling the negative impacts associated with recently arrived species
