Smarandache Rings:

Smarandache Rings W. B. Vasantha Kandasamy, 2002 Generally in any human field a Smarandache Structure on a set A means a weak structure W on A such that there exists a proper subset B which is embedded with a stronger structure S By proper subset one understands a set included in A different from the empty set from the unit element if any and from A These types of structures occur in our every day s life that s why we study them in this book Thus as two particular cases A Smarandache ring of level I S ring I is a ring R that contains a proper subset that is a field with respect to the operations induced A Smarandache ring of level II S ring II is a ring R that contains a proper subset A that verifies A is an additive abelian group A is a semigroup under multiplication For $a, b \in A$ $a \cdot b = 0$ if and only if $a = 0$ or $b = 0$ **A Study on Neutrosophic Zero Rings** T. Chalapathi, L. Madhavi, Abstract algebra is largely concerned with the study of abstract sets endowed with one or more binary operations along with few axioms In this paper we consider one of the basic algebraic structures known as a ring called a classical ring *Smarandache Fuzzy Algebra* W.
