### **Constructing Ambient**

**Intelligence** Max Mühlhäuser, Alois Ferscha, Erwin Aitenbichler, 2008-08-17 A foreword for the present workshop proceedings cannot be provided without first looking at the larger context of the AMI conference in which the workshops were organized The AMI 2007 conference has roots in preceding events but in many respects AMI can be called a novel conference format and hence a premiere Among the several aims that inspired and shaped this new conference format the

following two are particularly worth considering 1 to provide a forum for the ambient intelligence flavor of research on the Post PC era of computer science complementing the ubiquitous computing and pervasive computing flavors emphasized by already existing conferences 2 to offer an event that attracts contributions from all over the globe yet emphasizes European strengths with particular reference to the Information Society Technologies IST branch of the EU research framework programs FPs which carry the same label as the conference The workshop organization chairs reflected these unique characteristics of the new AMI conference series in the call for workshop proposals using two corresponding measures 1 by particularly soliciting workshops on in depth topics corresponding to the above mentioned ambient intelligence flavor of Post PC research 2 by offering two different workshop threads one usual thread for advanced topics called SW workshops and one thread for workshops related to concrete EU FP6 and FP7 projects called EU workshops

Li, Rama Chellappa, 2009-06-02 The development of technologies for the identification of individuals has driven the interest and curiosity of many people Spearheaded and inspired by the Bertillon coding system for the classification of humans based on physical measurements scientists and engineers have been trying to invent new devices and classification systems to capture the human identity from its body measurements One of the main limitations of the precursors of today's biometrics which is still present in the vast majority of the existing biometric systems has been the need to keep the device in close contact with the subject to capture the biometric measurements This clearly limits the applicability and convenience of biometric systems This book presents an important step in addressing this limitation by describing a number of methodologies to capture meaningful biometric information from a distance Most materials covered in this book have been presented at the International Summer School on Biometrics which is held every year in Alghero Italy and which has become a flagship activity of the IAPR Technical Committee on Biometrics IAPR TC4 The last four chapters of the book are derived from some of the best presentations by the participating students of the school The educational value of this book is also

highlighted by the number of proposed exercises and questions which will help the reader to better understand the proposed topics

**The 2nd IET International Conference on Intelligent Environments ,2006      Assistive Technologies in Smart Cities** Alejandro Rafael Garcia Ramirez, Marcelo Gitirana Gomes Ferreira, 2018-12-13

Cities are the places where the greatest technological advances will take place in the near future and important efforts are being directed towards autonomy and independence for each and every citizen. However, these efforts are rarely coordinated or integrated among governments, citizens, and private firms. In this book, assistive technology solutions are approached considering the smart cities scenario. The book discusses how assistive technologies can be adapted to this new reality. In fact, several challenges arise stimulating the evolution of current technologies relying on ubiquitous sensing, big data, and anytime anywhere access and control. The book presents research under development, not necessarily with consolidated results. Even though the idea of smart cities is still not a recognized concept in most countries, its relevance and application are spreading rapidly.
