*Hidden Hunger and the Transformation of Food Systems* Hans Konrad Biesalski, 2020-10-06. Hidden hunger is not about providing enough calories; it is about a lack of micronutrients which has long consequences for the children who are mostly affected. This begins with physical and cognitive developmental disorders and continues with an increased risk of non-communicable diseases and the occurrence of obesity. The book compiles the contributions of the Fourth Congress on Hidden Hunger 2019 as original articles. The focus of the congress was the problem of malnutrition and overweight which can coexist and is termed a double burden. Part of the book deals with the causes of malnutrition and the challenge of achieving an agricultural system that is more focused on food quality. Another part discusses the causes and intervention approaches to tackling childhood obesity, especially in connection with malnutrition. All in all, this publication is a summary of important work by highly renowned authors on the topic of the congress.

*Hidden Hunger and the Transformation of Food Systems: How to Combat the Double Burden of Malnutrition*. Like its two predecessors, the book fills an important gap by summarizing the essential aspects for science, applied research, and politics at a high level.

*Food Science and Technology* Oluwatosin Ademola Ijabadeniyi, 2023-11-06. Food Science and Technology: Fundamentals and Innovation presents the aspects of microbiology, chemistry, nutrition, and process engineering required for the successful selection, preservation, processing, packaging, and distribution of quality food. It is a valuable resource for researchers and students in food science, technology, and food industry professionals and entrepreneurs. There are two new chapters in the 2nd Ed: COVID-19 and food supply chain, as well as climate-smart food science.

*Bio- and Nano-sensing Technologies for Food Processing and Packaging* Ashutosh Kumar Shukla, 2022-10-19. The importance of processing and

packaging food items so that they are safe for the consumer cannot be underestimated. Sensors have an important role to play in this and sensing technologies have attracted the attention of the scientific community in view of increasing environmental and societal concerns. This edited volume presents a collection of ten chapters discussing the current trends of bio and nano sensing technologies for processing and packaging of food items. Starting with an overview chapter which introduces the field, the book goes on to discuss novel applications related to preservation, authenticity and safety of foods. Intelligent food packaging and nano based sensing are covered and the book finishes with a look towards the pros and cons of how this will revolutionise sensing throughout the food sector. It will be of benefit to scientists and practising professionals conducting research in the areas of food processing, contamination and food safety and academic researchers and graduate students studying food technology or food engineering.

**Food Safety and Human Health** Ram Lakhan Singh, Sukanta Mondal, 2019-07-30. Despite advances in hygiene, food treatment and food processing, diseases caused by foodborne pathogens continue to constitute a worldwide public health concern. Ensuring food safety to protect public health remains a significant challenge in both developing and developed nations. Food Safety and Human Health provides a framework to manage food safety risks and assure a safe food system. Political, economic and ecological changes have led to the re-emergence of many foodborne pathogens. The globalization of food markets, for example, has increased the challenge to manage the microbial risks. This reference will help to identify potential new approaches in the development of new microbiologically safe foods that will aid in preventing food borne illness outbreaks and provides the basic principles of food toxicology, food processing and food safety. Food Safety and Human Health is an essential resource to help students, researchers and industry professionals understand and address day to day problems regarding food contamination and safety. Encompasses the first pedagogic treatment of the entire range of toxic compounds found naturally in foods or introduced by industrial contamination. Identifies areas of vital concern to consumers such as toxicological implications of food and human health implications of food processing. Focuses on safety aspects of genetically modified foods and the range of processing techniques along with the important food safety laws.
