Why Only Humans Weep Ad Vingerhoets,2013-02-28 Crying has fascinated mankind for millenia Since ancient times we have known that emotional tears are a unique human characteristic Unsurprisingly over hundreds of years scholars from different backgrounds have speculated about the origin and functions of human tears According to Charles Darwin tears fulfilled no adaptive function And yet this seems in sharp contrast to statements in the popular media about the significance of crying Crying is thought to bring relief and is considered healthy and withholding tears unhealthy In addition tears have been said to inhibit aggression in assaulters and to promote social bonding Perhaps that could explain why tears have been so important in our evolution Ad Vingerhoets is one of the few scientists in the world to have studied crying He examines in *Why only humans weep* which claims about crying are scientifically tenable which are fact and which are fiction Though a psychologist he doesn't just restrict himself to the current psychological literature but also explores work in evolutionary biology neurosciences theology art history and anthropology to provide an integrated perspective on this complex phenomenon Written throughout in an academically accessible style this book is groundbreaking in contributing to a modern scientific understanding of crying It will have broad appeal to psychologists psychiatrists philosophers biologists and anthropologists **Writers and Pilgrims** Donald Roy Howard,1980-01-01 *The Freeman* Francis Neilson,Albert Jay Nock,1923 **The Literature and the Literary Men of Great Britain and Ireland** Abraham Mills,1852
