Re-mapping Narrative Gian S. Pagnucci, Nicholas Mauriello, 2008 This volume is an exploration of the future of narrative discourse The authors have identified six potential paths drawing patterns of narrative and visual pedagogy and possibility The volume begins with Tales of the Digital Self By telling stories we define ourselves This struggle to understand who and what we are is even more amplified on the Web where identity is almost liquid The authors in the second section picture how stories will be told in the future In Pixels of Heroes and Heroines we reconnect the future of narrative discourse to its literary roots Although it is important to consider the forms narratives will take in the future it is equally important to consider how these stories will be taught This is the issue authors take up in Stories from Wired Desktops Chapters move into the realm of the political in Views of Techno Identity and Virtual Spaces The volume concludes with the chapters in Critical Reflections on Project UNLOC *Cumulated Index to the Books* ,1999 *Under Construction* Christine Farris, Chris M.
