correlation with the unnecessary suffering principle long term health effects of individual weapons most notably nuclear weapons are being recognized through jurisprudence as particular cause of superfluous injury or unnecessary suffering Such recognition is due to their unceasing continuous detrimental effect on human health and quality of life even after the end of an armed conflict The author argues that weapons causing unending long term harmful effects on human body are in fact violating the principle prohibiting superfluous injury or unnecessary suffering by violating the temporal application of the law of armed conflict As a result the principle is increasingly interpreted by judicial bodies in medical terms as opposed to military necessity alone The book aims to clarify the changing nature of this basic principle of weapons law improve its clarity and overall comprehension of the concept as particularly unnecessary suffering and superfluous injury is often brought up during disarmament conferences and weapons treaty negotiations at international bodies
