Minh Nguyen, 2017-12-29 This collection presents twenty seven new essays in Japanese aesthetics by leading experts in the field Beginning with an extended foreword by the renowned scholar and artist Stephen Addiss and a comprehensive introduction that surveys the history of Japanese aesthetics and the ways in which it is similar to and different from Western aesthetics this groundbreaking work brings together a large variety of disciplinary perspectives including philosophy literature and cultural politics to shed light on the artistic and aesthetic traditions of Japan and the central themes in Japanese art and aesthetics Contributors explore topics from the philosophical groundings for Japanese aesthetics and the Japanese aesthetics of imperfection and insufficiency to the Japanese love of and respect for nature and the paradoxical ability of Japanese art and culture to absorb enormous amounts of foreign influence and yet maintain its own unique identity *New Essays in Japanese Aesthetics* will appeal not only to a wide range of humanities scholars but also to graduate and undergraduate students of Japanese aesthetics art philosophy literature culture and civilization Masterfully articulating the contributors Japanese aesthetical concerns and their application to Japanese arts including literature theater film drawing painting calligraphy ceramics crafts music fashion comics cooking packaging gardening landscape architecture flower arrangement the martial arts and the tea ceremony these engaging and penetrating essays will also appeal to nonacademic professionals

and general audiences This seminal work will be essential reading for anyone interested in gaining a deeper understanding of Japanese aesthetics

Masterpieces on Japan by Foreign Authors Shōichi Saeki, Tōru Haga, 2023-03-23 This open access book includes forty one chapters about foreign observers discourses on Japan These include a wide range of perspectives from the travelogues of curious visitors to academic theses by scholars which offer us a broad spectrum of contents reflecting a variety of attitudes toward Japan The works were written during the period from the 1850s to the 1980s a timespan during which Japan became in stages more open to the outside world after a long isolation under the Tokugawa shogunate From the perspective of Japanology one can discern three distinct periods of rising interest in the country from abroad The first tide of such interest came shortly after the opening of Japan when various foreign travelers including those who could not be included in this book came over and wrote down their impressions of the country which was for them a land of mystery and mystique which had just opened its doors to them The second wave arose at the beginning of the twentieth century just after the Russo Japanese War when Japan again generated a remarkable surge of interest as a miracle in Asia that had pulled off the wondrous feat of defeating a white superpower The third wave was more recent which took place from the late 1960s to the 1980s a period of high economic growth when the miracle of Japan s remarkable economic recovery from the defeat of World War II attracted enthusiastic and curious attention from the outside world once again It is not the intention of this book to directly highlight such historical transitions but these forty two brilliant mirrors forty one chapters including forty two discourses even when looked in casually provide us with unexpected insights and various perspectives Sh ichi Saeki 1922 2016 was Professor Emeritus the University of Tokyo T ru Haga 1931 2020 was Professor Emeritus International Research Center for Japanese Studies

Between Reason and Experience Andrew Feenberg, 2010-04-09 A leading philosopher of technology calls for the democratic coordination of technical rationality with everyday experience The technologies markets and administrations of today s knowledge society are in crisis We face recurring disasters in every domain climate change energy shortages economic meltdown The system is broken despite everything the technocrats claim to know about science technology and economics These problems are exacerbated by the fact that today powerful technologies have unforeseen effects that disrupt everyday life the new masters of technology are not restrained by the lessons of experience and accelerate change to the point where society is in constant turmoil In Between Reason and Experience leading philosopher of technology Andrew Feenberg makes a case for the interdependence of reason scientific knowledge technical rationality and experience Feenberg examines different aspects of the tangled relationship between technology and society from the perspective of critical theory of technology an approach he has pioneered over the past twenty years Feenberg points to two examples of democratic interventions into technology the Internet in which user initiative has influenced design and the environmental movement in which science coordinates with protest and policy He examines methodological applications of critical theory of technology to the case of the French Minitel computing network

and to the relationship between national culture and technology in Japan Finally Feenberg considers the philosophies of technology of Heidegger Habermas Latour and Marcuse The gradual extension of democracy into the technical sphere Feenberg argues is one of the great political transformations of our time **The Culture of Copying in Japan** Rupert Cox,2007-09-12 This book challenges the perception of Japan as a copying culture through a series of detailed ethnographic and historical case studies It addresses a question about why the West has had such a fascination for the adeptness with which the Japanese apparently assimilate all things foreign and at the same time such a fear of their skill at artificially remaking and automating the world around them Countering the idea of a Japan that deviously or ingenuously copies others it elucidates the history of creative exchanges with the outside world and the particular myths philosophies and concepts which are emblematic of the origins and originality of copying in Japan The volume demonstrates the diversity and creativity of copying in the Japanese context through the translation of a series of otherwise loosely related ideas and concepts into objects images texts and practices of reproduction which include shamanic theatre puppetry tea utensils Kyoto town houses architectural models genres of painting calligraphy and poetry sample food displays and the fashion and car industries
