Questions seeks to champion the art of curiosity by setting out a framework to make every question count. The fundamental building blocks of insight are data and information joined together in new and often unpredictable ways. The way we surface new data and information and make meaningful connections between data points is by asking smarter questions. By taking this approach you can make your organisation a less confrontational, more collaborative and more productive environment in which to work, particularly in the more distributed and remote settings that will characterise the 2020s. Managers, directors and leaders will find the universal principles, expert interviews and data-driven recommendations a source of inspiration to share with their teams. Asking Smarter Questions is aimed at professionals in businesses and organisations across all sectors and will help those working in many functions including market research, intelligence, insight, analytics, strategy, marketing, communications, planning, product development and innovation.

Praxiology and the Philosophy of Technology Wojciech W. Gasparski, Timo Airaksinen, 2021-10-18 Technology is a crucial feature of the modern world and human beings are necessarily technological creatures Our goal must be to use technology effectively efficiently and ethically We have hands that are adept at using tools and intelligence that guides our actions We also have desires and emotions that motivate us to achieve more and more never allowing us to stop From the viewpoint of praxiology technology does not exist merely to satisfy the human need in an effective and efficient way The problems of the modern world and the questions we must ask with respect to technology and how it is used are complicated and demanding They may initially seem mysterious perhaps even partly subconscious In this fifteenth volume of a distinguished international series contributors address essential questions about the philosophy and ethics of technology Their intention is to point out the road not only to its better applications but also to its greater understanding The first part of the book addresses general questions about the theory of technology The second part of the volume focuses on special topics like information and communication technologies and work systems as well as the foundations of problem solving and the history of innovation in the age of enlightenment The third part of the book is on ethical judgments It emphasizes the importance of ethics in the application of technology and especially when we commercialize it in order to meet the needs of the people in a free market society This volume offers its reader a balanced picture of the state of the art of theoretical and applied issues in technology research emphasizing the praxiological perspective that characterizes the entire series
