Circle Projects** Andy Liu,2017-09-07 This book describes projects in a Mathematical Circle i e an organization that discovers and nurtures young mathematical talents through meaningful extra curricular activities This is the second volume in a trilogy describing in particular the S M A R T Circle project which was founded in Edmonton Canada in 1981 The acronym S M A R T stands for Saturday Mathematical Activities Recreations Tutorials This book Volume II is based on the papers published in scientific and education journals by the Circle members while they were still in junior high school some still in elementary school In essence it explains the purpose of the Circle Volume I describes how to run a Circle and Volume III explains what actually takes place in the Circle All three volumes provide a wealth of resources mathematical problems quizzes and games together with their solutions The books will be of interest to self motivated students who want to conduct independent research teachers who work with these students and teachers who are currently running or planning to run Mathematical Circles of their own **Modern Mathematical Methods For Scientists And Engineers: A Street-smart Introduction** Athanassios Fokas,Efthimios Kaxiras,2022-12-12 Modern Mathematical Methods for Scientists and Engineers is a modern introduction to basic topics in mathematics at the undergraduate level with emphasis on explanations and applications to real life problems There is also an Application section at the end of each chapter with topics drawn from a variety of areas including neural networks fluid dynamics and the behavior of put and call options in financial markets The book presents several modern important and computationally efficient topics including feedforward neural networks wavelets generalized functions stochastic optimization methods and numerical methods A unique and novel feature of the book is the introduction of a recently developed method for solving partial differential equations PDEs called the unified transform PDEs are the mathematical cornerstone for describing an astonishingly wide range of phenomena from quantum mechanics to ocean waves to the diffusion of heat in matter and the behavior of financial markets Despite the efforts of many famous mathematicians physicists and engineers the solution of partial differential equations remains a challenge The unified transform greatly facilitates this task For example two and a half centuries after Jean d Alembert formulated the wave equation and presented a solution for solving a simple problem for this equation the unified transform derives in a simple

manner a generalization of the d Alembert solution valid for general boundary value problems Moreover two centuries after Joseph Fourier introduced the classical tool of the Fourier series for solving the heat equation the unified transform constructs a new solution to this ubiquitous PDE with important analytical and numerical advantages in comparison to the classical solutions The authors present the unified transform pedagogically building all the necessary background including functions of real and of complex variables and the Fourier transform illustrating the method with numerous examples Broad in scope but pedagogical in style and content the book is an introduction to powerful mathematical concepts and modern tools for students in science and engineering **Smart City and Informatization** Guojun Wang,Abdulmotaleb El Saddik,Xuejia Lai,Gregorio Martinez Perez,Kim-Kwang Raymond Choo,2019-11-05 This book constitutes the refereed proceedings of the 7th International Conference on Smart City and Informatization iSCI 2019 held in Guangzhou China in November 2019 The volume presents 52 full papers which were carefully reviewed and selected from 139 submissions The papers are organized in topical sections on Internet of Things IoT and smart sensing urban computing and big data smart society informatization technologies cloud edge fog computing for smart city applications for smart city informatization assistive engineering and information technology cyberspace security blockchain and applications **Smart Computer Vision** B.
