The Anxiety Workbook for Supporting Teens Who Learn Differently Clare Ward, James Galpin, 2021-04-21 The teenage years are associated with high levels of uncertainty and anxiety compounded by academic and social demands and physical and emotional changes. They can be especially tough for teenagers who learn differently. This workbook contains a host of practical activities for teachers and other adults supporting young people with learning differences, whether at home or in the classroom. Drawing on their years of first hand experience and up to the minute research, the authors outline a trans diagnostic framework for identifying what might be behind a student's behaviour. They show how the first crucial step all practitioners must take is to work out what could be causing a teen's feelings of anxiety or uncertainty and how this can be addressed. The activities in this workbook are organised into three sections, each addressing one of the three key areas where anxiety or uncertainty can be found: the structural, sensory and social domains. The tried and tested worksheets and activities present a much needed alternative to a diagnosis led approach. They can be used with any teenager with or without a diagnosis in classroom settings, intervention groups or one to one work. The Anxiety Workbook will help you to really understand and address the needs of the SEN students you support, thereby improving their well being, confidence and self esteem and empowering them to get the most out of their education. *Teaching the Male Brain* Abigail Norfleet

James, 2007-03-15 Differentiate your teaching style to address learning differences between girls and boys in the classroom. The author provides qualitative and quantitative research to show why boys learn differently and demonstrates how you can differentiate teaching strategies to help boys succeed. This easy to use handbook shows you how to Recognize sociological and neurobiological foundations of cognitive gender differences. Look critically at curricula and teaching practices, evaluate how well they work with boys and uncover areas where changes can be made. Develop educational approaches based on research and classroom practice that are responsive to the learning differences of both boys and girls. **'Hands on'**
