Smiling Buddha:

India's Nuclear Fuel Cycle Taraknath V.K. Woddi, William S. Charlton, Paul Nelson, 2022-06-01 An analysis of the current February 2009 status and future potential of India's nuclear fuel cycle is presented in this book. Such a fuel cycle assessment is important but relatively opaque because India regards various aspects of its nuclear fuel cycle as strategically sensitive. Any study therefore necessarily depends upon reverse calculations based on the information that is available: expert assessments, engineering judgment and anecdotal information. In this work every effort is made to provide transparency to these foundations so that changes can be made in light of alternative expectations or subsequent information. This book should be of interest to policy experts, governmental specialists, technologists, nuclear technologists and others seeking to understand and explain the associated facts and potential consequences of the recent U S India civil nuclear accord. Table of Contents: Introduction, A Brief History of the Indian Nuclear Program, Indian Nuclear Facilities, Fuel Cycle Analysis From Beginning to Present, Day Fuel Cycle Analysis, Future Projections, Alternate Reactor Systems, Conclusions, Acknowledgements.

When a neuroscientist is found dead a few days later, Inspector Abinay Chaturvedi is perplexed at the common evidence found at both the crime scenes: a carved arrow with a mysterious engraving. As Abinay and his trusted man Lance set out to unravel the mystery, a young and charismatic historian hints at the possible hand of a two thousand year old secret society in the killings. Is there really a secret society working to safeguard dharma? Is Abinay ready to unravel the centuries old secret? Will Abinay and his team reach the bottom of the mystery of the carved arrow? **Faceless: The Mystery of the Carved Arrow** is an intriguing journey of an honest policeman trying to find the truth and the nail biting aftereffects of man's challenging nature with science.

Ploughshares and Swords Jayita Sarkar, 2022-07-15 India's nuclear program is often misunderstood as an inward looking endeavor of secretive technocrats In *Ploughshares and Swords* Jayita Sarkar challenges this received wisdom narrating a global story of India's nuclear program during its first forty years The book foregrounds the program's civilian and military features by probing its close relationship with the space program Through nuclear and space technologies India's leaders served the technopolitical aims of economic modernity and the geopolitical goals of deterring adversaries The politically savvy transnationally

connected scientists and engineers who steered the program obtained technologies materials and information through a variety of state and nonstate actors from Europe and North America including both superpowers They thus maneuvered around Cold War politics and the choke points of the nonproliferation regime Hyperdiversification increased choices for the leaders of the nuclear program but reduced democratic accountability at home The nuclear program became a consensus enforcing device in the name of the nation *Ploughshares and Swords* is a provocative new history with global implications It shows how geopolitical and technopolitical visions influence decisions about the nation after decolonization Thanks to generous funding from the Swiss National Science Foundation the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories
