China's Future Nuclear Submarine Force Lyle J. Goldstein, Andrew S. Erickson, William S. Murray, Andrew Wilson, 2012-04-30 One of the key concerns of naval strategists and planners today is the nature of the Chinese geostrategic challenge. Conceding that no one can know for certain China's intentions in terms of future conflict, the editors of this hot topic book argue that the trajectory of Chinese nuclear propulsion for submarines may be one of the best single indicators of China's ambitions of global military power. Nuclear submarines with their unparalleled survivability remain ideal platforms for persistent operations in far-flung sea areas and offer an efficient means for China to project power. This collection of essays presents the latest thinking of leading experts on the emergence of a modern nuclear submarine fleet in China. Each contribution is packed with authoritative data and cogent analysis. The book has been compiled by four professors and analysts at the U.S. Naval War College who are co-founders of the college's recently established China Maritime Studies Institute. Given the opaque nature of China's undersea warfare development, readers will benefit from this penetrating investigation that considers the potential impact of even the most revolutionary changes in Chinese nuclear submarine capabilities. The editors believe that to ignore such possibilities would be the height of strategic folly and represent inexcusable negligence in terms of U.S. national defense. Anyone who is interested in the future of the U.S. Navy and the defense of the United States will find this book to be essential reading.

Majury,Dawn Moore,Neil Sargent,Christiane Wilke,2016-11-25 A rich collection of interdisciplinary essays this book explores
the question what is to be found at the intersection of the sensorium and law s empire Examining the problem of how legal
rationalities try to grasp what can only be sensed through the body these essays problematize the Cartesian framework that
has long separated the mind from the body reason from feeling and the human from the animal In doing so they consider how
the sensorium can operate variously as a tool of power or as a means of countering the exercise of regulatory force The
senses it is argued operate as a vector for the implication of subjects in legal webs but also as a powerful site of resistance to
legal definition and determination From the sensorium of animals to technologically mediated perception the ways in which
the law senses and the ways in which senses are brought before the law invite a questioning of the categories of liberal
humanism And as this volume demonstrates this questioning opens up the both interesting and important possibility of
imagining other sensual subjectivities **The Trident of Delta Delta Delta** Delta Delta Delta,1928
