By understanding and applying the principles of motivation described in the text, students will not only discover insights into what motivates their own behavior but also how to instigate self-change through goal setting. Throughout the book, the author adopts an evolutionary approach to explore the effect of interpersonal relationships, food preferences, fear, music, and the emotions on motivation at the same time, considering how personality traits and psychological needs are essential for understanding why people are motivated by different things. The motivation of compulsive behavior from addictions such as drugs, gambling, Internet gaming, and obsessive exercise is also considered, providing a truly comprehensive overview of biological, psychological, and environmental sources of motivation. The sixth edition has been thoroughly updated throughout and is accompanied by an instructor's manual that contains multiple-choice questions, essay questions with answers, websites related to motivation and emotion, power-point slides for class activities, and discussion questions.
