Jasinski, 2001 This book tells an interesting story of the early backroads and scenic destinations of drivers struggles and traveling troubles **SOCRATES** Jasmine Fernandez, Dr C Upendra, Dr Amarjeet Nayak, Dr Ghasemali Kouchnani, Nadia Maftouni, Alexandros Schismenos, Dr Michelle Blakely, Dr Curtis R. Blakely, Rotimi Adeforiti, Gizachew W. Gifayehu, Prof. (Dr) Inderjeet Singh Sodhi, Dr. Prakash Chand Kandpal, Isha, Sisay Assemrie Temesgen, 2019-04-28 This issue of SOCRATES has been divided into three sections The first section of this issue is English Literature The paper authored by Jasmine Fernandez Dr C Upendra and Dr Amarjeet Nayak explore the medical thriller Coma through a grotesque lens This study provides us with the idea that grotesquery is employed as a template to translate meanings and interpretations of medical thrillers Through multiple responses as elicited by the grotesque these thrillers engage with readers differently and hence produce varied responses The second section of this issue is Philosophy The first paper of this section has been authored by Ghasemali Kouchnani and Nadia Maftouni explores the Semiotics of Love in Suhrawardi's Allegorical Philosophy The paper concludes that the theme of Suhrawardi's stories is mystical love and the wayfarer loves God This love is to be spiritual emotion rather than passionate love simply because on his way the seeker must overcome his own inner and outer senses These perceptions are symbolized by ten towers ten graves ten flyers ten wardens

five chambers and five gates These are the allegories of perceptions i e the five internal and the five external senses could be seen in Treatise on Towers A Tale of Occidental Exile The Simurgh s Shrill Cry The Red Intellect and On the Reality of Love The second paper of this section has been authored by Alexandros Schismenos The paper represents an opinion that as a chimera time travel is non feasible and impossible To support his claim the author briefly outlines the origins of the time travel concept and its epistemological and metaphysical ontological conditions If these conditions prove to be absurd the logical impossibility of time travel will have been demonstrated The third section of this issue is Political science The first paper of this section has been authored by Dr Michelle L Blakely and Dr Curtis R Blakely This paper represents the first application of the Game theory to the field of penology conceptualizing the relationship between prisons and prisoners as a game provides insight into the motivations strategic behaviors and decision making processes of its players The second paper of this section has been authored by Rotimi Adeforiti which tends to identify the factors responsible for the crises of integration in the Nigeria federal system The paper concludes that the foundations of federalism were laid by the British consciously or unconsciously for the existence of Nigeria The country subscribed to federal system of government and had been practicing it The problem facing Nigeria federal system today among others is no longer amalgamation of the country but the interest of various elite or elite to be in the country The third paper of this section has been authored by Gizachew Wondie Gifayehu which attempts to analyse the development and practice of citizenship and citizenship rights in Ethiopia The fourth paper of this section has been authored by Prof Inderjeet Singh Sodhi This paper deals with the current status of water management in India and its emerging issues and challenges The fifth paper of this section has been authored by Dr Prakash Chand Kandpal This paper focuses on the development of sustainable cities highlighting the actions and initiatives undertaken by the Government of Delhi to combat the menace of pollution in Delhi The sixth paper of this section authored by Isha presents the concept of Public Private Partnership and also evaluates its progress in school education in India The paper concludes that the introduction of the PPP model in school education in India could help in the achievement of desired results as the payments are made by the government against the services delivered through the private sector But there is a risk sharing between both government and private sector which is helpful for the delivery of public services in an efficient manner However PPP in the education sector has a long way to go as the schools approved under PPP model in some states of India like Assam Bihar Himachal Pradesh Meghalaya Mizoram Nagaland Odisha Tripura and West Bengal are still not functioning The seventh paper of this section has been authored by Sisay Assemrie Temesgen This paper analyzes the moral acceptability of violent force and retaliation at the individual and community level and in the arena of national and international politics

The Western Journal of Black Studies ,2000 **Coffeehouse Culture in the Atlantic World, 1650-1789** E. Wesley Reynolds,2022-03-10 This book argues that coffeehouses and the coffee trade were central to the making of the Atlantic world in the century leading up to the American Revolution Fostering international finance and

commerce spreading transatlantic news building military might determining political fortunes and promoting status and consumption coffeehouses created a web of social networks stretching from Britain to its colonies in North America As polite alternatives to taverns coffeehouses have been hailed as penny universities a place for political discussion by the educated and elite Reynolds shows that they were much more than this Coffeehouse Culture in the Atlantic World 1650 1789 reveals that they simultaneously created a network for marine insurance and naval protection led to calls for a free press built tension between trade lobbyists and the East India Company and raised questions about gender respectability and the polite middling class It demonstrates how coffeehouses served to create transatlantic connections between metropole Britain and her North American colonies and played an important role in the revolution and protest movements that followed

Social Contract Theory in American Jurisprudence Thomas R. Pope, 2013-06-07 Despite decades of attempts and the best intentions of its members the United States Supreme Court has failed to develop a coherent jurisprudence regarding the state s proper relationship to the individual Without some objective standard upon which to ground jurisprudence decisions have moved along a spectrum between freedom and authority and back again affecting issues as diverse as individual contractual liberties and the right to privacy Social Contract Theory in American Jurisprudence seeks to reintroduce the lessons of modern political philosophy to offer a solution for this variable application of legal principle and to lay the groundwork for a jurisprudence consistent in both theory and practice Thomas R. Pope s argument examines two exemplary court cases *Lochner v New York* and *West Coast Hotel v Parrish* and demonstrates how the results of these cases failed to achieve the necessary balance of liberty and the public good because they considered the matter in terms of a dichotomy Pope explores our constitution s roots in social contract theory looking particularly to the ideas of Thomas Hobbes for a jurisprudence that is consistent with the language and tradition of the Constitution and that is also more effectually viable than existing alternatives Pope concludes with an examination of recent cases before the Court grounding his observations firmly within the developments of ongoing negotiation of jurisprudence Addressing the current debate between individual liberty and government responsibility within the context of contemporary jurisprudence Pope considers the implications of a Hobbesian founding for modern policy This book will be particularly relevant to scholars of Constitutional Law the American Founding and Modern Political Theory

China's Aerospace Strategy ,2013-02-15 China has emerged as a major regional power and has clear aspirations to be a global power in the not too distant future Comprehensive military modernisation programs sustained economic scientific and technological developments have substantially elevated China s international profile For the past three decades China has been modernising its strategic weaponry and enhancing the capabilities of its nuclear warheads It has also been developing new and complex military platforms that would be of great value to joint operations warfare The decade from 2011 through 2020 will prove critical to the PLA as it attempts to integrate many new and complex platforms and to adopt modern operational concepts including network centric warfare China s air force is in the midst of a transformation A decade ago it was an antiquated service equipped almost exclusively with weapons based on 1950s era Soviet designs and operated by personnel with questionable training according to outdated employment concepts Today the PLAAF appears to be on its way to becoming a modern highly capable air force for the 21st century The PLA Air Force has continued expanding its inventory of long range advanced SAM systems and now possesses one of the largest such forces in the world The January 2011 flight test of China s next generation fighter prototype the J 20 highlights China s ambition to produce a fighter aircraft that incorporates stealth attributes advanced avionics and super cruise capable engines over the next several years China is upgrading its B 6 bomber fleet with a new longer range variant that will be armed with a new long range cruise missile China s aviation industry is developing several types of airborne early warning and control system AWACS aircraft These include the KJ 200 based on the Y 8 airframe for AWACS as well as intelligence collection and maritime surveillance and the KJ 2000 based on a modified Russian IL 76 airframe China can decisively defeat India in any nuclear confrontation but is currently unable to match the IAF in any conventional conflict specifically along the border region of the Himalayas Also the IAF has greater experience than PLAAF in actual combat operations with its many conflicts India is gradually building powerful military capabilities in tune with its expanding geopolitical interests even as the eastern and western fronts are being strengthened to deter the twin Pakistan China threat IAF is on the path to transform into a true aerospace power with the

capability to rapidly deploy and operate at great distances As for the two front challenge apart from progressively basing Sukhoi 30MKI fighters and missile squadrons in the two theatres the plan also includes upgrading the airfields and advanced landing grounds in the sectors in order to give both defensive and offensive options It is important for India to realise the relevance of Chinese achievements in space technologies and to critically view and analyse Chinese achievements in the area of manned space missions In order to achieve further success in the space arena developments in cryogenic technology are important for India These should be pursued in order to develop the capability of launching 4 5 ton satellites which will help in achieving a greater commercial edge Programmes like moon and mars missions using robotic technologies are also important in order to know more about the nature of resources especially minerals available on these bodies and undertaking their mining It is also important to work towards launching satellites for India s armed forces which will help gain an advantage over adversaries The book is an attempt to analyse the strategic importance of rising economic political and military stature of China with a view to understand its regional and global implications in a new world order As a rational actor in a chaotic world China will defend its security interests at all costs Besides undertaking a comprehensive modernisation of its armed forces China is developing a series of offensive space capabilities while advocating the peaceful use of outer space The book will be of immense value not only to the readers of the countries in the immediate neighbourhood of China but to the strategic community across the globe since rise of China and other major Asian players including India will shape the strategic international environment in the decades to come during this century It is hoped that the book will contribute to the understanding of the growing importance of integration of air and space and the fact that aerospace has truly become the new theatre of war and thereby establishing a new milestone in mankind s history of warfare The unifying space dimension will remain the single most important source for information and communication which can be used in multiple forms Hence China s aerospace strategy and its implications for India assume greater military importance
