Technologies Robin Mansell, 2007 The production and consumption of information and communication technologies or ICTs are becoming deeply embedded within our societies The influence and implications of this have an impact at a macro level in the way our governments economies and businesses operate and at a micro level in our everyday lives This handbook is about the many challenges presented by ICTs It sets out an intellectual agenda that examines the implications of ICTs for individuals organizations democracy and the economy Explicitly interdisciplinary and combining empirical research with theoretical work it is organised around four themes covering the knowledge economy organizational dynamics strategy and design governance and democracy and culture community and new media literacies It provides a comprehensive resource for those working in the social sciences and in the physical sciences and engineering fields with leading contemporary research informed principally by the disciplines of anthropology economics philosophy politics and sociology

The Internet Myth Paolo Bory, 2020-04-29 The Internet is broken and Paolo Bory knows how we got here In a powerful book based on original research Bory carefully documents the myths imaginaries and ideologies that shaped the material and cultural history of the Internet As important as this book is to understand our shattered digital world it is essential for those who would fix it

Vincent Mosco author of *The Smart City in a Digital World* The Internet Myth retraces and challenges the myth laying at the foundations of the network ideologies the idea that networks by themselves are the main agents of social economic political and cultural change By comparing and integrating different sources related to network histories this book emphasizes how a dominant narrative has extensively contributed to the construction of the Internet myth while other visions of the networked society have been erased from the collective imaginary The book decodes analyzes and challenges the foundations of the network ideologies looking at how networks have been imagined designed and promoted during the crucial phase of the 1990s Three case studies are scrutinized so as to reveal the complexity of network imaginaries in this decade the birth of the Web and the mythopoesis of its inventor and the histories of two Italian networking projects the infrastructural plan Socrate and the civic network Iperbole the first to give free Internet access to citizens The Internet Myth thereby provides a compelling and hidden sociohistorical narrative in order to challenge one of the most powerful myths of our time This title has been published with the financial assistance of the Fondazione Hilda e Felice Vitali Lugano Switzerland
