

Time series empirical evidence about innovation and employment

Greenhalgh et al. Scottish JPE, V 48(3) 2001

Data – panel of UK industrial firms 1987-94

Estimated demand for labour function including measures of their innovative activities

- Doing R&D associated with raised employment
- Predicted effect of doubling R&D (= German levels) in R&D active firms $\rightarrow$ 2.6% rise in jobs
- Gaining patents also gives higher employment
- One more patent per firm $\rightarrow$ 0.4% rise in jobs
- Dividing sample by high-tech and low-tech:
 - R&D impact larger (4%) in high-tech sectors
 - patent impact larger (1%) in low-tech sectors

Technological Change And Employment Innovation In The German Economy

**Friedrich Buttler, Wolfgang
Franz, Ronald Schettkat, David Soskice**

Technological Change And Employment Innovation In The German Economy:

Technological Change and Employment Ronald Schettkat, Michael Wagner, 2019-07-08 No detailed description available for Technological Change and Employment Technological Change and Regional Development in Europe Ludwig Schätzl, Javier Revilla Diez, 2012-12-06 This book presents the findings of the extensive research programme funded by the Deutsche Forschungsgemeinschaft German Research Council and entitled Technological Change and Regional Development in Europe The goal of this programme was to carry out research by means of empirical surveys into the relationship between technological change and regional development Over a period of six years a total of 50 research projects have been undertaken in three phases each lasting two years This research programme has succeeded in actively involving leading German regional scientists from many universities as well as non university research institutions In addition numerous research projects were carried out in close co operation with internationally renowned partners We should like to express our gratitude for the support provided by the Deutsche Forschungsgemeinschaft Without their financial backing of the research programme it would not have been possible to undertake such an ambitious project Thanks also go to the contributors of this volume for their willingness to participate in our joint project We wish in addition to acknowledge the contribution of Prof Dr Philip Cooke whose refereeing of the chapters has enhanced the quality of the work presented here Finally our thanks go to Angela Spence for her expert editorial assistance linguistic editing and the preparation of the Index and also Franco Vaio for taking care of the technical aspects and production of the final copy Their combined efforts have been crucial for successfully bringing together contributions from so many different authors in a single volume

Innovation and Technological Change in Eastern Europe Michael Fritsch, Horst Brezinski, Horst Dieter Brezinski, 1999-11-25 Reserach suggests that innovation and technical change are crucial for the economic recovery of the former centrally planned countries in Central and Eastern Europe This text analyzes the development of innovation systems and technology in this region from various perspectives Globalization, Information Technology and Development J. James, 1999-02-24 Jeffrey James develops the insights of the often separate literatures on globalization and information technology and demonstrates their interdependence The central insight is that globalization is mainly a technological phenomenon driven by influences exerted on international trade and foreign investment by various forms of information technology Developing countries however are not sharing equally in the gains from globalization thus induced by the new technologies These gains tend to be concentrated among a narrow group of relatively advanced countries and moreover within some of those countries information technology appears to exacerbate existing income inequalities Elgar Companion to Neo-Schumpeterian Economics Horst Hanusch, Andreas Pyka, 2007 The Elgar Companion to Neo Schumpeterian Economics is a cutting edge collection of specially commissioned contributions highlighting not only the broad scope but also the common ground between all branches of this prolific and fast developing field of economics For 25

years economists have been investigating industrial dynamics under the heading of neo Schumpeterian economics which has itself become a mature and widely acknowledged discipline in the fields of innovation knowledge growth and development economics The Elgar Companion to Neo Schumpeterian Economics surveys the achievements of the most visible scholars in this area The contributions to the Companion give both a brief survey on the various fields of neo Schumpeterian economics as well as insights into recent research at the scientific frontiers The book also illustrates the potential of neo Schumpeterian economics to overcome its so far self imposed restriction to the domains of technology driven industry dynamics and to become a comprehensive approach in economics suited for the analysis of development processes in all economic domains Integrating both the public sector and financial markets the book focusses on the co evolutionary processes between the different domains As a roadmap for the development of a comprehensive neo Schumpeterian theory the Companion will be an invaluable source of reference for researchers in the fields of industrial dynamics and economic growth and academics and scholars of economics generally PhD students will find the Companion an indispensable general introduction to the field of neo Schumpeterian economics It will also appeal to politicians and consultants engaged in national and international policy as the Companion deals with the highly important and ever topical phenomena of economic development

Economics of Structural and Technological Change Cristiano Antonelli, Nicola De Liso, 2002-09-11 Technology has long been seen as a path to economic growth However there is considerable debate about the exact nature of this relationship Economics of Structural and Technological Change employs a wide range of theoretical and applied approaches to explore the concept of technological change The book begins with a series of in depth discussions of the economic analysis of technological change The second section contains a discussion of theoretical models of technological change focusing on issues such as time and innovation The third section brings together a number of applied analyses of technological change and examines the effect of factors such as human resource constraints patenting and science and technology indicators

Institutional Frameworks and Labor Market Performance Friedrich Buttler, Wolfgang Franz, Ronald Schettkat, David Soskice, 2005-08-17 Institutional Frameworks and Labor Market Performance produces an in depth analysis of the functioning of various labor market institutions in both the USA and Germany Particular emphasis is given to the substantial differences between the US and Germany in the ways important areas are regulated The authors show that the impact of institutions on economic performance is ambivalent They argue that in this sense the decision is not one between regulation and deregulation but rather one between different degrees and forms of regulation

Germany's Technological Performance H. Legler, G. Licht, A. Spielkamp, 2012-12-06 Maintaining the innovation capabilities of firms employees and institutions is a key component for the generation of sustainable growth employment and high income in industrial societies Gaining insights into the German innovation system and the institutional framework is as important to policy making as is data on the endowment of the German economy with factors fostering innovation and their recent development Germany's Federal Ministry of

Education and Research has repeatedly commissioned reports on the competitive strength of the German innovation system since the mid eighties The considerable attention that the public and the political administrative and economic actors have paid to these reports in the past few years proves the strong interest in the assessment of and indicators for the dynamics behind innovation activities The present study closely follows the pattern of those carried out before It has been extended however to include an extensive discussion on indicators for technological performance and an outline of the key features of the German innovation system

Productivity, Inequality, and the Digital Economy Nathalie Greenan,Yannick L'Horty,Jacques Mairesse,2002-08-02 Essays on the computer and the economy particularly in relation to employment rates and to wage inequality The widespread diffusion of information and communication technologies ICT has had controversial seemingly paradoxical consequences ICT are viewed as driving growth and employment in the United States while contributing to European unemployment and the so called Euroclerosis At the same time both the United States and Europe have seen increased wage inequalities between skilled and unskilled workers This book explores the computer s puzzling effects on the economy at both the micro and macro levels The contributions include data from field work small samples of firms and national surveys of management practice econometric studies and macroeconomic theoretical analysis

Technological Change and Labor Markets Reyna Elizabeth Rodríguez Pérez,Liliana Meza González,2024-10-28 In developed countries like the United States Germany and the UK it has been observed that workers who perform non routine activities either cognitive or manual have benefited in terms of employment and income while those performing routinary tasks have seen their job prospects and wages decline This has led to not only a polarization of the labor markets but also a decrease in certain measures of inequality This phenomenon has been attributed to task based technological change TBTC which differs from the skilled biased technological change in the fact that not only highly skilled workers have benefited from technology advancement This book presents evidence of how digitalization and TBTC are affecting the labor markets of different regions of the world and examines the factors that cause this inequality among nations It examines recent issues around the effect of TBTC on the labor market and the economy in general with a comparison of different countries in Central and Eastern Europe North America and Latin America as well as in other regions of the world The incorporation of these regions presents relevant particularities for the subject matter addressed in the book The book also considers questions such as how labor market effects differ by gender and what the impact of digital skills on employment inequalities and public policies might be In so doing it identifies the advances opportunities and changes that have taken place while also making public policy proposals This book will be a key reading to the global community of graduate students and researchers in the field of economics and specifically in the study of labor markets

Technological Change And Employment Innovation In The German Economy Book Review: Unveiling the Power of Words
