Technological Change At Work:

The Process of Technological Change Jon Clark, Ian McLoughlin, Howard Rose, Robin King, 1990-06-28 *Work and Technological Change* Stephen R. Barley, 2020-10-27 In recent years a growing number of commentators have declared that we are at the beginning of a technical revolution that will see profound changes in the way we live and work Yet what constitutes a technological revolution and what logic supports how successive technological revolutions have unfolded in Western societies How do technologies change organizations and what are the implications of intelligent technologies for work and employment Here Stephen R Barley reflects on over three decades of research to explore both the history of technological change and the approaches used to investigate how technologies are shaping our work and organizations He begins by placing current developments in artificial intelligence into the historical context of previous technological revolutions drawing on William Faunce's argument that the history of technology is one of progressive automation of the four components of any production system energy transformation transfer and control technologies He then considers how technologies change work and when those changes will and will not result in organizational change In doing so he lays out a role based theory of how technologies produce changes in organizations He then tackles the issue alongside Matt Beane of how to conceptualize a more thorough approach to assessing how intelligent technologies such as artificial intelligence can shape work and employment They identify the main reasons why the current state of research on intelligent technologies in the workplace is inadequate and provide pointers on how empirical studies in this area may and must be improved He concludes with a discussion with his long time colleague Diane Bailey about the fears that arise when one sets out to study technical work and technical workers and the methods that they and future ethnographers can use for controlling those fears

Work, Organizations, and Technological Change Gerhard Mensch, Richard J. Niehaus, 2012-12-06 This volume is the proceedings of the Symposium entitled Work Organizations and Technological Change which was held in Garmisch Partenkirchen West Germany 14-19 June 1981 The meeting was sponsored by the Special Panel on Systems Sciences of the NATO Scientific Affairs Division In proposing this meeting the Symposium Directors built upon several preceding NATO conferences in the general area of personnel systems manpower modelling and organization The most recent NATO Conference entitled Manpower Planning and Organization Design was held in Stresa Italy in 1977 That meeting was organized to foster research on the interrelationships between programmatic approaches to personnel planning within organizations and behavioral science approaches to organization design From that context of corporate planning the total internal organizational perspective was the MACRO view and the selection assignment care and feeding of the people was the MICRO view Conceptually this meant that an integrated approach was needed if all the dimensions of such problems within private and public organizations were to come out correctly

Technological Change and Labor Markets Reyna Elizabeth Rodríguez Pérez, Liliana Meza González, 2024-10-28 In developed countries like the United States Germany and the

UK it has been observed that workers who perform non routine activities either cognitive or manual have benefited in terms of employment and income while those performing routinary tasks have seen their job prospects and wages decline This has led to not only a polarization of the labor markets but also a decrease in certain measures of inequality This phenomenon has been attributed to task based technological change TBTC which differs from the skilled biased technological change in the fact that not only highly skilled workers have benefited from technology advancement This book presents evidence of how digitalization and TBTC are affecting the labor markets of different regions of the world and examines the factors that cause this inequality among nations It examines recent issues around the effect of TBTC on the labor market and the economy in general with a comparison of different countries in Central and Eastern Europe North America and Latin America as well as in other regions of the world The incorporation of these regions presents relevant particularities for the subject matter addressed in the book The book also considers questions such as how labor market effects differ by gender and what the impact of digital skills on employment inequalities and public policies might be In so doing it identifies the advances opportunities and changes that have taken place while also making public policy proposals This book will be a key reading to the global community of graduate students and researchers in the field of economics and specifically in the study of labor markets
