Resources in Education, 2001-10 *Remote Workforce Training: Effective Technologies and Strategies* Hai-Jew, Shalin, 2014-02-28 Lifelong learning can occur both in and out of the classroom but the most valuable instruction takes place on the job Remote Workforce Training Effective Technologies and Strategies investigates methods techniques and systems used in employee training programs The tools and technologies surveyed within these pages will help employers take their workers beyond the transient skill sets offered by university degrees and into a constant state of learning and practice that will enhance both their productivity and technical abilities on a regular basis In particular the knowledge offered by this reference book will be of use to educators and students as well as managers leaders administrators and personnel

Remote Access Technologies for Library Collections: Tools for Library Users and Managers Fulkerson, Diane M., 2012-03-31 This book is crucial to understanding changes and the new expectations that library users have in the 21st century including identifying implementing and updating new technologies understanding copyright and fair use laws creating metadata for access to digital collections and meeting user needs Provided by publisher **Copyright & Home Copying. Technology Challenges the Law** Congress of the U.S., Washington, DC. Office of Technology Assessment, 1989 Home recording technologies allow today's consumer to make near perfect copies of recorded music television shows movies and other copyrighted works for private use at home With the advance of digital recording equipment consumers will be able to reproduce these copyrighted works with even greater accuracy This is an issue of great concern for copyright owners who claim that home copying is detrimental to their sales This report presents an examination of home recording technologies and their relationship to the legal status of home copying a comparison of the economic effects that home audiotaping may have on the recording industry with the effects that restricting home taping might have on consumers a discussion of legal action that Congress or the industry may initiate and the results of a national survey of home taping and copying behavior The report is divided into seven chapters 1 Summary Issues and Options 2 Technological Change and Home Copying 3 Legal Aspects of Copyright and Home Copying 4 An Overview of the U S Record Industry 5 Copyright Royalties for Music and Sound Recording 6 The OTA Office of Technology Assessment Survey and 7 Economic Perspectives on Home Copying Appendixes contain a description of the survey development and review a copy of the survey questionnaire OTA survey tables and a list of contractor reports related to the study MAB *Research in Education*, 1973

Technologies for Prospecting, Extraction, and Utilization of Space Resources Paul Zabel, Philipp Reiss, Angel Abbud-Madrid, Beth Lomax, Florian Kehl, Valentin T. Bickel, Hendrik Kolvenbach, Philip Arm, Gabriela Ligeza, 2024-11-18

Sustainable exploration of the solar system requires a large amount of material and propellant to be transported out of Earth's gravity well and onwards to their destination. Despite recent advances in lowering launch costs, transferring material from Earth to space is still very costly. It still amounts to several thousand to tens of thousands of Euros per kilogram to low Earth orbit and transportation to the Moon and Mars, even a multiple of that. There is an abundance of resources in our solar system that can be utilized to reduce the material required to be launched from Earth significantly. Among these resources are water, ice, hydrates, metals, regolith, rare earth elements, chemical compounds, volatiles, and rare isotopes. Utilizing these space resources would enable, e.g., consumable and propellant production in space, manufacturing, or the construction of large structures which would otherwise be very expensive or not possible at all with material launched from Earth. Lunar regolith, for example, contains iron and titanium that could be used to produce spacecraft components or structural elements for a lunar base, while oxygen released from oxide minerals could be used for respiration or as a propellant. In addition, water ice could be extracted from regolith and used for consumption or agricultural applications. Although there have been numerous missions to the Moon, there are still a lot of unknowns concerning its surface, making it difficult to know where to look for resources and how to extract them.
