Technology Commercialization:

Technology Commercialization Manual Melvin Joseph DeGeeter, 2004 **From Lab to Market** S.K. Kassicieh, H.R. Radosevich, 2013-06-29 The topic of this book the commercialization of public sector technology continues to grow in importance in the United States and similar societies The issues involved are relevant to many roles including those of policy makers managers patent attorneys licensing agents and technical staff members of public technology sources Institutions increasingly involved in the process include federal and other government laboratories and their related agencies public universities and their state governments public and private transfer agents and of course all the private recipients of public technology Scarcely a day goes by without a significant event related to technology transfer and commercialization The popular business press is regularly carrying articles addressing the issues explaining new initiatives and describing events of notable success or failure 1 As an example of current important events the Technology Reinvestment Project TRP is formulating its initiatives to transfer public technology and promote technology based public/private partnerships as a collaboration between the Advanced Research Projects Agency ARPA the National Institute of Standards and Technology NIST the National Science Foundation NSF the National Aeronautics and Space Administration NASA and the Department of Energy Defense Programs DOE DP Technology Commercialization National Research Council and Russian Academy of Sciences, Policy and Global Affairs, Office of International Affairs, Committee on Utilization of Technologies Developed at Russian Research and Educational Institutions, 1998-12-09 This collection of papers by American and Russian specialists addresses a variety of legal regulatory institutional and financial issues that can promote or hinder technology commercialization The book is the result of a series of workshops organized by the National Research Council with the Russian Academy of Sciences on commercialization of technologies particularly those developed at research and educational institutions Technology Commercialization concludes with a list of actions programs and policies which warrant further consideration as Russia tries to improve the success of technology commercialization This book will be of interest to those concerned with small business development in post communist states university technology management and comparative technology commercialization **Technology Commercialization** Shannon Sheehan, 2000 Technology Transfer United States. General Accounting Office, 1990 Spanning Boundaries and Disciplines Gary D. Libecap, Marie Thursby, Sherry Hoskinson, 2010-10-11 This volume addresses the challenges that can arise when individuals from technical business and legal environments must converge on the goal of commercialization Specifically it brings together studies from organizational behavior marketing economic and sociological perspectives on commercialization of university technologies Technology and the Wealth of Nations , 1992-10 Most discussions of U S economic competitiveness focus on the creation of new technologies but the abundant evidence presented in this timely book indicates that the key factor underpinning U S competitiveness is not the development of technology itself but the factors that influence the commercialization of technology

The importance of effective management and performance in the commercialization of new technologies reflects today's changing environment. The post war decades of undisputed U S scientific and technological hegemony have been replaced by a period in which U S firms are challenged by foreign competitors in some fields and struggling to regain their former positions in others. Although the U S scientific research establishment arguably has lost little if any of its post war preeminence the same cannot be said with respect to the performance of U S firms as developers, adapters and managers of new technologies largely because government policies have not been conducive to successful commercialization of technology. As we enter the last decade of the twentieth century economic policy and performance are being linked more and more closely to technology related issues. Technology commercialization is now recognized as critical to this linkage and this book constitutes a state of the art analysis of this vital but often overlooked aspect of technological innovation. The sixteen papers in this volume contribute to three important tasks. First they draw on new developments in theoretical and empirical analysis to integrate the macro and microeconomic dimensions of technological innovation and commercialization. Second they extend and enrich the macroeconomic analysis of growth, capital formation and international economic interactions to highlight the influences of macroeconomic variables on technology commercialization. Technology and capital investment are shown to be complementary inputs to the growth process which means that favorable investment conditions are prerequisites for higher growth rates. Third they also extend and enrich the microeconomic analysis of technological innovation and commercialization in the process providing guidance for managers seeking to improve performance in both of the areas.

Commercialization of Federally Funded R&D ,1988 **Open and Closed Innovation** Philipp Herzog, 2011-01-22 Philipp Herzog develops a theoretical framework arguing that Open Innovation and Closed Innovation cultures need to be distinguished. The findings help firms cope with the challenges experienced in implementing the Open Innovation concept.
