Princeton Alumni Weekly ,1993 Mass Media James B. Martin, 2002 Mass media has become an integral part of the human experience News travels around the world in a split second affecting people in other countries in untold ways Although being on top of the news may be good at least for news junkies mass media also transmits values or the lack thereof condenses complex events and thoughts to simplified sound bites and often ignores the essence of an event or story The selective bibliography gathers the books and magazine literature over the previous ten years while providing access through author title and subject indexes **Simulation, Planning, and Society** Melville C. Branch, 1997-01-28 Melville C Branch continues his lifelong examination of planning as inherent in all human activities and the primary determinant of our prospects and survival as a species This latest work discusses the use of simulation throughout society as the representation of what is considered or planned Simulation is everpresent in many different forms such as financial statements representing the economic state of a business flight simulators used in training pilots and wind tunnels and hydrodynamic tanks employed in research Scientific sample polls of relatively few people reveal the collective opinion of entire populations Mathematical models are used to analyze all sorts of phenomena and to plan many activities Literature law music and art simulate human thoughts emotions concerns and conclusions Simulation is an essential element of individual behavior and societal action
