**Television for World Understanding** I. Keith Tyler, 1970      *Understanding Augmented Reality* Alan B.

Craig, 2013-04-26 *Understanding Augmented Reality* addresses the elements that are required to create augmented reality experiences. The technology that supports augmented reality will come and go, evolve and change. The underlying principles for creating exciting, useful augmented reality experiences are timeless. Augmented reality designed from a purely technological perspective will lead to an AR experience that is novel and fun for one-time consumption but is no more than a toy. Imagine a filmmaking book that discussed cameras and special effects software but ignored cinematography and storytelling. In order to create compelling augmented reality experiences that stand the test of time and cause the participant in the AR experience to focus on the content of the experience rather than the technology, one must consider how to maximally exploit the affordances of the medium. *Understanding Augmented Reality* addresses core conceptual issues regarding the medium of augmented reality as well as the technology required to support compelling augmented reality. By addressing AR as a medium at the conceptual level in addition to the technological level, the reader will learn to conceive of AR applications that are not limited by today's technology. At the same time, ample examples are provided that show what is possible with current technology. Explore the different techniques, technologies, and approaches used in developing AR applications. Learn from the author's deep experience in virtual reality and augmented reality applications to succeed right off the bat and avoid many of the traps that catch new developers and users of augmented reality experiences. Some AR examples can be experienced from within the book using downloadable software.

**Television Regulation and Media Policy in China** Yik-Chan Chin, 2016-08-12 Since the late 1990s, there has been a crucial and substantial transformation in China's television system involving institutional, structural, and regulatory changes. Unravelling the implications of these changes is vital for understanding the politics of Chinese media policy making and regulation, and thus a comprehensive study of this history has never been more essential. This book studies the transformation of the policy and regulation of the Chinese television sector within a national political and economic context from 1996 to the present day. Taking a historical and sociological approach, it engages in the theoretical debates over the nature of the transformation of media in the authoritarian Chinese state, the implications of the ruling party's political legitimacy, and China's central-local conflicts upon television policy making and market structure, and the nature of the media modernisation process in a developing country. Its case studies include broadcasting systems in Shanghai and Guangdong, which demonstrate that varied policies and development strategies have been adopted by television stations reflecting different local circumstances and needs. Arguing that rather than being a homogenous entity, China has demonstrated substantial local diversity and complex interactions between local, national, and global media, this book will be of interest to students and scholars of Chinese media politics and policy and international communications.
