**Tensioning of tendons force elongation relationship** FIB - International Federation for Structural Concrete, 1986-01-01 Describes the behaviour of tendons as structural elements and deals with the special problem of the effects of surface condition of the individual tendons This report is useful to authorities consultants contractors and post tensioning contractors It provides information on planning and execution of various types of prestressing work

*Tensioning of Tendons* FIP Commission on Practical Construction. Working Group on Tensioning of Tendons, Force-Elongation Relationship, 1986 Describes the behaviour of tendons as structural elements and deals with the special problem of the effects of surface condition of the individual tendons This report is useful to authorities consultants contractors and post tensioning contractors It provides information on planning and execution of various types of prestressing work

**Preparation of specifications for post tensioning work** FIB - International Federation for Structural Concrete, 1992-10-01 fib Model Code for Concrete Structures 2010 fib - fédération internationale du béton, 2013-10-01 The International Federation for Structural Concrete fib is a pre normative organization Pre normative implies pioneering work in codification This work has now been realized with the fib Model Code 2010 The objectives of the fib Model Code 2010 are to serve as a basis for future codes for concrete structures and present new developments with regard to concrete structures structural materials and new ideas in order to achieve optimum behaviour The fib Model Code 2010 is now the most comprehensive code on concrete structures including their complete life cycle conceptual design dimensioning construction conservation and dismantlement It is expected to become an important document for both national and international code committees practitioners and researchers The fib Model Code 2010 was produced during the last ten years through an exceptional effort by Joost Walraven Convener Delft University of Technology The Netherlands Agnieszka Bigaj van Vliet Technical Secretary TNO Built Environment and Geosciences The Netherlands as well as experts

out of 44 countries from five continents *Recommendations for the acceptance of post tensioning systems* FIB - International Federation for Structural Concrete, 1993-06-01 *Prestressed Concrete Design* M.K. Hurst, 2017-12-21 Prestressed concrete is widely used in the construction industry in buildings bridges and other structures The new edition of this book provides up to date guidance on the detailed design of prestressed concrete structures according to the provisions of the latest preliminary version of Eurocode 2 Design of Concrete Structures DD ENV 1992 1 1 1992 The emphasis throughout is on design the problem of providing a structure to fulfil a given purpose but fundamental concepts are also described in detail All major topics are dealt with including prestressed flat slabs an important and growing application in the design of buildings The text is illustrated throughout with worked examples and problems for further study Examples are given of computer spreadsheets for typical design calculations Prestressed Concrete Design will be a valuable guide to practising engineers students and research workers

**Construction of Prestressed Concrete Structures** Ben C.

Gerwick, Jr., 1997-02-13 Methods and practices for constructing sophisticated prestressed concrete structures Construction of Prestressed Concrete Structures Second Edition provides the engineer or construction contractor with a complete guide to the design and construction of modern high quality concrete structures This highly practicable new edition of Ben C Gerwick's classic guide is expanded and almost entirely rewritten to reflect the dramatic developments in materials and techniques that have occurred over the past two decades The first of the book's two sections deals with materials and techniques for prestressed concrete including the latest recipes for high strength and durable concrete mixes new reinforcing materials and their placement patterns modern prestressing systems and special techniques such as lightweight concrete and composite construction The second section covers application to buildings bridges pilings and marine structures including offshore platforms floating structures tanks and containments Special subjects such as cracking and corrosion repair and strengthening of existing structures and construction in remote areas are presented in the final chapters For engineers and construction contractors involved in any type of prestressed concrete construction this book enables the effective implementation of advanced structural concepts and their economical and reliable translation into practice

**Inspection and Maintenance of Reinforced and Prestressed Concrete Structures** FIP Commission on Practical Construction. Editorial Group on Inspection and Maintenance of Structures, 1986 The vast extent of the investment in concrete structures in modern times has emphasized the need to maintain these structures in a systematic manner so that they retain their structural integrity and full usefulness Such maintenance must be preceded by regular and thorough inspection This Guide to Good Practice describes the many types of damage slight or more serious which may be discovered and the equipment used to carry out inspections Suggested inspection intervals related to the severity of loadings and environmental conditions are given

**Corrugated Plastic Ducts for Internal Bonded Post-tensioning** fib Fédération internationale du béton, 2000-01-01 Optimum corrosion protection of post tensioning tendons has been a priority since the beginning of this technology The temporary ban of grouted post tensioning tendons in the United Kingdom from 1992 1996 has initiated a review of all aspects related to durability of post tensioning tendons One of the UK conclusions of this review was to require encapsulation of the post tensioning tendons into wear resistant and leak tight plastic ducts to serve as an additional corrosion protection barrier Since that time other countries have at least partially adopted similar approaches Designs of these plastic ducts may vary significantly between different suppliers In addition experience with these systems is still relatively limited Hence these plastic ducts cannot be standardised at this time Therefore the former FIP Commission 2 and now fib Commission 9 Reinforcing and Prestressing Materials and Systems has set up a task group to prepare a fib report on corrugated plastic ducts for internal bonded post tensioning This report is written as a guide for an approval process for such plastic ducts It shall serve readers such as authorities and engineers as a guide on how to set up a formal state approval process for these ducts or at least allow them to properly assess systems offered for a specific project CEB
