The field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest in the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly. The various societies: Society for Economic Botany, International Society of Ethnopharmacology, Society of Ethnobiology, International Society for Ethnobiology and many regional and national societies in the field currently have thousands of members. Growth has been most robust in BRIC countries. The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research. We anticipate including the best and latest research on a full range of descriptive, methodological, theoretical and applied research on the most important plants for each region. Each contribution will be scientifically rigorous and contribute to the overall field of study.

Indigenous Sacraments Oriol Ambrogio Gali, 2024-12-04. *Indigenous Sacraments* provides the first study of Indigenous perceptions of the Christian sacraments at the fringes of colonial Spanish America, particularly in the missions established by the Jesuits in northwestern Mexico, central southern Chile and the Gran Chaco. After Jesuit missionaries arrived in these regions between the end of the sixteenth and the early seventeenth centuries, their sacraments came to control every rite of passage from birth to reaching adulthood to the formation of new families to death. Through the administration of the sacraments, missionaries intended to replace extant Indigenous habits and beliefs with Christian values. The disruptions triggered by such processes raised multiple local reactions from initial curiosity and incomprehension to rejection, partial acceptance and ritual imitation. Locals debated the newly introduced rituals and both violently rejected them and developed their own versions, becoming active participants in the sacraments' diffusion. Oriol Ambrogio Gali draws on a range of diverse sources to explore the changing attitudes toward the sacraments and to highlight the cultural and religious evolution of the Indigenous groups living at the fringes of Spanish America. By exploring local perceptions of the Christian sacraments, Ambrogio Gali shows that Indigenous peoples were far from static recipients of Christianity in the Americas.

Defiance and Deference in Mexico's Colonial North Susan M. Deeds, 2010-01-01. Thomas F. McGann Memorial Prize, Rocky Mountain Council on Latin American Studies, 2004. Southwest Book Award, Border Regional Library Association, 2003. In their efforts to impose colonial rule on Nueva Vizcaya from the sixteenth century to the middle of the seventeenth century, Spaniards established missions among the principal Indian groups of present-day eastern Sinaloa, northern Durango and southern Chihuahua, Mexico: the Xiximes, Acaxees, Conchos, Tepehuanes and Tarahumaras. Yet when the colonial era ended two centuries later, only the Tepehuanes and Tarahumaras remained as distinct peoples, the other groups having disappeared or blended into the emerging mestizo culture of the northern frontier. Why were these two indigenous peoples able to maintain their group identity under conditions of conquest while the others

could not In this book Susan Deeds constructs authoritative ethnohistories of the Xiximes Acaxees Conchos Tepehuanes and Tarahumaras to explain why only two of the five groups successfully resisted Spanish conquest and colonization Drawing on extensive research in colonial era archives Deeds provides a multifaceted analysis of each group s past from the time the Spaniards first attempted to settle them in missions up to the middle of the eighteenth century when secular pressures had wrought momentous changes Her masterful explanations of how ethnic identities subsistence patterns cultural beliefs and gender relations were forged and changed over time on Mexico s northern frontier offer important new ways of understanding the struggle between resistance and adaptation in which Mexico s indigenous peoples are still engaged five centuries after the Spanish Conquest *Once a River* Amadeo M. Rea,2021-11-09 Like many rivers of the arid Southwest the Gila is for much of its length a dry bed except after seasonal rains Yet a mere century ago it hosted a thriving biological community and two centuries ago American Indians fished from its banks It is no mystery how the desert swallowed up the Gila Beaver trapping overgrazing and woodcutting first ruined natural watersheds then damming confined the last drops of its surface flow Historical sources and archaeological data inform us of the Gila s past but its bird life further testifies to the changes Amadeo Rea traces the decline of bird life on the Middle Gila in a book that addresses the broader issue of habitat deterioration Bird lovers will find it a storehouse of data on avian migration patterns and on ornithological classification based on skeletal structure Anthropologists can draw on its Piman ethnoclassification of birds which links the Gila River tribe with various other Uto Aztecan peoples of Mexico s west coast But for all concerned with protecting our environment *Once a River* offers evidence of change that might be apprehended elsewhere It is a case history of a loss that perhaps need never have occurred *God's Middle Finger* Richard Grant,2008-03-04 Part gonzo misadventure part cultural history *God s Middle Finger* explores a fascinating land the Sierra Madre mountains of Mexico where few outsiders are foolish enough to venture **Tracing Childhood** Jennifer L. Thompson,Marta P. Alfonso-Durruty,John J. Crandall,2014-05-20 Bioarchaeological studies of children have until recently centered on population data driven topics like mortality rates and growth and morbidity patterns This volume examines emerging issues in childhood studies looking at historic and prehistoric contexts and framing questions about the nature and quality of children s lives How did they develop their social identity Were they economic actors in early civilizations Does their health reflect the larger community Comparing and contrasting field research from a variety of sites across Europe and the Americas the contributors to this volume demonstrate that children not only have unique experiences but they also share cross culturally in daily struggles Their lives differ significantly from those of adults due to disparate social identities and variable growth needs In some of the cases presented this is the first time that child remains have been examined in any detail making *Tracing Childhood* an essential resource for scholars and researchers in this growing field **Landscapes of Power and Identity** Cynthia Radding,2006-01-18 This comparative frontier history explores the role that natural environments played in shaping the contours of European indigenous
