navigators of his time the author demonstrated an early aptitude for seamanship It was noted by his superiors that he possessed gifts both for command and the drawing of maps after he had sufficiently rose through the Royal Navy s ranks that he was given command of the HMS Investigator Tragically the years he spent captured took a toll on his health he died in 1814 aged forty a mere four years after arriving home in England

A Voyage to Terra Australis Matthew Flinders,2010-08-26 In the early nineteenth century Australia remained largely uncharted and doubt prevailed as to its unity as a continent The 1801 expedition led by English mariner and cartographer Matthew Flinders 1774 1814 was groundbreaking in this respect Flinders charting of the Australian coastline provided the first complete map outlining the continent and his influence was decisive in changing its name from Terra Australis to Australia a term more agreeable to the ear Structured around daily geographical and astronomical observations Flinders journals published in 1814 the day before his death are remarkable for their humanity and sense of humour Started in 1801 they continue to include Flinders imprisonment by the French in the island of Mauritius between 1803 and 1810 The second volume tells of the discoveries made along the east and north coasts of the continent and includes an account of Flinders captivity An appendix details botanical discoveries
