Terra Nova:

Terra Nova Jack Bouchard, 2025-10-07 A bottom up story of the fishworkers whalers First Nations merchantwomen oceans and animals who together made a new colonial world in the early Atlantic In the early decades of the sixteenth century mariners from across Europe forged a vast seasonal fishery along the coasts of the northwest Atlantic Long before there was Newfoundland or Canada Europeans called this floating colony Terra Nova and they laid the foundation for a history of extracting food and fuel that extended into the twentieth century Once one of the largest European colonies in the Atlantic basin Terra Nova has never before been considered in its historical entirety or in a wider Atlantic context Historian Jack Bouchard tells the story of Terra Nova showing that its early development was shaped by colonial histories across the Atlantic world He demonstrates that when we put food production ocean environments and maritime labor at the center of the story we can see the overlooked lives and voices of those who made change in these early years The result is a new history of the Atlantic world one where humans migrate in the wake of ice and fish where Indigenous American and Arctic trade routes are joined to transatlantic exchange where colonies exist without settlement or empire and where food production labor and maritime landscapes are at the center of our shared history

The SS Terra Nova (1884-1943) Michael C. Tarver, 2020-08-03 SS Terra Nova was most famous for being the vessel to carry the ill fated 1910 polar expedition led by Robert Falcon Scott but the story of this memorable ship built in wood to enable flexibility in the ice continued until 1943 when she sank off Greenland This newly designed and updated edition presents the definitive illustrated account of one of the classic polar exploration ships of the heroic age Put together from accounts recorded by the men who sailed in her it tells the sixty year history of a ship built by a famous Scottish shipbuilding yard in the nineteenth century days of whaling and sealing before coal gas and electricity replaced animal oils

The Longest Winter Meredith Hooper, 2012-10-16 Through the eyes of the men involved Meredith Hooper recounts one of the greatest tales of adventure and endurance which has often been overshadowed by the tragedy that befell Scott Their tents were torn their food was nearly finished and the ship had failed to pick up the members of Scott's Northern Party as planned Gale force winds blew bitter with the cold of approaching winter Stranded and desperate Lieutenant Victor Campbell and his five companions faced disaster They burrowed inside a snowdrift digging an ice cave with no room to stand upright but space for six sleeping bags on the floor the three officers on one side the three seamen on the other Circumstances forced them closer together their roles blurred and a shared sense of reality emerged This mutual suffering made them indivisible and somehow they made it through the longest winter To the south the men waiting at headquarters knew that Scott and his Polar party must be dead and hoped that another six lives would not be added to the death toll Working from diaries journals and letters written by expedition members Meredith Hooper tells the intensely human story of Scott's other expedition

Coldest March Susan Solomon, 2013-05-09 The Coldest March tells the tragic story of Captain Robert Falcon Scott and his British team who in November 1911 began a trek across the snows of Antarctica striving to be the first to reach the South Pole After marching and skiing more than nine hundred miles the men reached the Pole in January 1912 only to suffer the terrible realisation that a group of five Norwegians had been there about a month earlier Scott and his four companions died on the return journey Whether they were courageous heroes or tragic incompetents has been debated ever since Susan Solomon brings a scientific perspective to her understanding of the men of the expedition their agonising struggle and the reasons for their deaths Drawing on extensive meteorological data and on her personal knowledge of the Antarctic she depicts in detail the sights sounds legends and ferocious weather of that singular place She reaches the startling conclusion that the polar party was struck down by exceptionally frigid weather a rare misfortune that confounded the men's meticulous predictions of what to expect This poignant and beautifully written book restores Scott and his men to the place of honour they deserve
