Technologies Without Boundaries On Telecommunications In A Global Age:

Technologies Without Boundaries Ithiel de Sola Pool, 1990 At the time of his death in 1984 political scientist Pool late of MIT had almost completed this vision of a new world resulting from the social and political consequences of communications technology It was edited into its final form by Eli Noam of Columbia University Annotation copyrighted by Book News Inc Portland OR *Telecommunications Update*, 1990 *The New ICT Ecosystem* Martin Fransman, 2010-03-25 The ICT sector is crucial as a driver of economic and social growth Not only is it an important industry in its own right but it also provides the communication and infrastructure without which modern economies could not function How does this sector work Why is it stronger in some countries than in others What should companies governments and regulators be doing to enhance its contribution In *The New ICT Ecosystem* Martin Fransman answers these and other questions by developing the idea of the ICT sector as an evolving ecosystem He shows that some components of the ICT ecosystem particularly the innovation process work better in some countries and regions than in others For example the Internet content and applications layer of the ecosystem tends to work better in the US than in Europe or Asia The analysis in this book enables policy makers and regulators to understand why some parts of the ICT ecosystem are underperforming and what can be done to enhance their performance The previous edition of *The New ICT Ecosystem* won the 2008 10 Joseph Schumpeter Prize The People's Right To Know Frederick Williams, John V. Pavlik, 2013-09-13 This important volume presents the pros and cons of a national service that will meet the information needs and wants of all people In the preface Everette E Dennis Executive Director of The Freedom Forum Media Studies Center asks What will a true information highway where most citizens enjoy a wide range of information services on demand do to local communities government and business entities other units of society and democracy itself It is no longer a question of whether a vastly expanded information highway will be built in America Telephone and cable companies have already inaugurated their plans and government will most likely incorporate such plans into the economic development policy of the late 1990s The key questions remaining are Who will pay for it and Whom exactly will it serve *The People's Right to Know* suggests that serving the everyday citizen should be the main objective of any national initiatives in this area It counsels that evolving electronic services are new communications media that should be deployed with a main focus on the public's needs interests and desires If advances in the nation's public telephone network will make information services as easy to use as ordinary voice calls or newspapers promise vast new electronic services awaiting their readers more attention must also be devoted to the information needs and wants of everyday citizens In our increasingly multicultural and technology driven society enormous inequities exist across America's socioeconomic classes regarding access to information critical to everyday life If an information highway is to be effective we need to ensure that all Americans have access to it its design must start with the everyday citizen This powerful new medium at our disposal must consider policy that includes attempts to close the information gap among our citizens It must ensure equal access to

data regarding job education and health information services legal information on such topics as immigration and transactional services that offer assistance on such routine but time consuming tasks as renewing a driver's license or registering to vote Media and telecommunications professionals communication scholars and policymakers including two former chairmen of the Federal Communications Commission provide insights and pointed commentary on the nature and shape of an information highway designed as a new public medium aimed at serving a wide range of public needs Their work should improve our basis for deciding if there are means by which an enhanced public telecommunications network can benefit the everyday working American

Geographical Information and Planning John Stillwell, Stan Geertman, Stan Openshaw, 2013-03-09 The 1990s have seen some remarkable changes in geographical information GI provision and computer technology that have impacted on many of the activities that constitute planning in all its different forms However relatively few texts in the field of geographical information systems GIS and planning have been published since Henk Scholten and John Stillwell edited *Geographical Information Systems for Urban and Regional Planning* in 1990 This volume seeks to redress the balance by showing how GI of various types is being used in urban physical environmental socio economic and business planning contexts at local regional and national scales with the assistance of GIS and modelling methods and how the uses of GI and GI technologies have evolved over the last decade During this period a number of meetings took place in Europe in different locations organised initially by European Geographical Information Systems EGIS 1990-94 and more recently by the Joint European Conference and Exhibition JEC on Geographical Information 1995-97 These meetings brought together members of the GI community from across the world to discuss GI research and GIS applications One of the Special Interest Groups associated with the JEC gatherings was that on Geographical Information and Planning and several of the contributions in this book have their origins in papers presented to the group's meetings

The Myth of Media Globalization Kai Hafez, 2013-07-08 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool Based on a theoretical debate of media globalization the work discusses most major fields of media development including foreign reporting satellite TV film internet foreign broadcasting media and migration media policy and media economy As an important new contribution to timely debates *The Myth of Media*

Globalization will be essential and provocative reading for students and scholars alike *Shanghai in Transition* Jos Gamble, 2005-07-27 In the decades following the introduction of Communist Party rule in Shanghai in 1949 the city's economy infrastructure and links with the world all atrophied However the past decade has seen far reaching economic reforms implemented to recreate Shanghai as a cosmopolitan world financial and trade centre This book focuses on the lives of local residents and their perceptions of their changing city and presents an evocative series of ethnographic perspectives of the city's shifting sociological landscape in this period of transition Parchment, Printing, and Hypermedia Ronald Deibert, 2000-01-15 Interweaving media theory and historical analysis this book explores the effect new digital telecommunication technologies which Deibert calls hypermedia will have on the distribution of political power in the next century Deibert tracks the transf

Public Administration Eran Vigoda-Gadot, 2002-06-07 Offering strategies for a new generation of administrative systems this book explores the impact of recent managerial reforms and shifting societal values on the stability legitimacy and progress of democratic governments The chapters highlight innovations in consumer communication management and marketing evolving methods of policy planning formation and implementation and the role of high information high technology in public agencies Providing insight into the changing environment present in most governing structures the book covers ethical dilemmas in public service the definition of work for public sector employees and population behavior during mass disasters **A Sociology of Modernity** Peter Wagner, 2002-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company
