Moody, Richard E. Morley, 2001-02-28 How will autonomous agents emergent systems and chaos theory change the way we live and work in the twenty first century As today's manufacturing and production systems grow increasingly complex tomorrow's science of complexity will produce paradoxically simple solutions argue technology experts Patricia Moody and Richard Morley in this astonishing vision of the year 2020 Containing both cutting edge insights and simple truths that provide a roadmap to the future of business and illustrated by case examples from such companies as Motorola Honda GM Solectron Intel Silicon Graphics Modicon Flavors NeXT Japanese Railway and Andover Controls The Technology Machine challenges readers to understand the spirit and core drivers of growth technology knowledge and individual excellence By combining rigorous research with their extensive experience with technology advances that have changed industry Moody and Morley are able to supply simple guidelines for future growth and detail their keen vision of future systems leaders and workers They isolate the three bad business habits at the root of manufacturing problems today shortsightedness restrictive structures and unbalanced improvement fads show how to break them and supply four infallible predictors of the types of breakthrough technologies that will come to dominate the world of the future In that world customers and suppliers are linked by real time online systems business is driven by customer designed point of consumption replication of product and a wide gap grows between The Island of Excellence organization of the future with its holistic approach including two year apprenticeships uniforms and morning exercises and The Others the non elite sweatshop like breakeven companies of the past The book is eloquent original and essential reading for managers in every area of business and industry **New Tools**

for Environmental Protection National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, 2002-06-13 Many people believe that environmental regulation has passed a point of diminishing returns the quick fixes have been achieved and the main sources of pollution are shifting from large point sources to more diffuse sources that are more difficult and expensive to regulate The political climate has also changed in the United States since the 1970s in ways that provide impetus to seek alternatives to regulation This book examines the potential of some of these new tools that emphasize education information and voluntary measures

Contributors summarize what we know about the effectiveness of these tools both individually and in combination with regulatory and economic policy instruments They also extract practical lessons from this knowledge and consider what is needed to make these tools more effective The book will be of interest to environmental policy practitioners and to researchers and students concerned with applying social and behavioral sciences knowledge to improve environmental quality
