Technology and Agricultural Development in Pre-war Japan Penelope Francks, 1984 **Japanese Studies from Pre-History to 1990** Richard Perren, 1992 **Agricultural Growth and Japanese Economic Development** Michael Smitka, 1998 This volume traces the modern critical and performance history of this play one of Shakespeare's most loved and most performed comedies The essay focus on such modern concerns as feminism deconstruction textual theory and queer theory **Agricultural Development and Tenancy Disputes in Japan, 1870-1940** Richard J. Smethurst, 2014-07-14 Richard Smethurst shows that the growth of a rural market economy did not impoverish the Japanese farmer Instead it led to a general increase in rural prosperity Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Technological Transformation of Japan* Tessa Morris-Suzuki, 1994-11-25 This landmark book is the first general English language history of technology in modern Japan **The Emergence of Modern Japan** Janet Hunter, 2014-06-06 The main emphasis of this book is upon political social and economic developments as conditioned by Japan's interaction with the outside world the advance of industrialisation and the emergence of the Japanese nation state Unlike previous textbooks on the history of modern Japan Janet Hunter's book adopts a thematic approach which makes the period much more accessible for readers who wish to pursue their particular interests throughout the period Moreover it will also establish a greater awareness of the cultural and institutional continuities which are crucial to any proper understanding of modern Japan

Agriculture and Economic Development in East Asia Joanna Boestel, Penelope Francks, Choo Hyop Kim, 2013-01-11 A comparative study which describes and analyses the contribution of agriculture to the economies of East Asia Until now little attention has been paid to the agricultural sector which actually underpins industrial and commercial development Recently this sector has become the focus of increasingly bitter economic disputes especially over protection and the use of import tariffs A comparative framework is used employing case studies from Japan Taiwan and South Korea to highlight both the common characteristics of agriculture's role in East Asian development and features particular to the political economy of agriculture in each country **Japanese Economic Development** Penny Francks, 2015-05-19 This fully revised and updated third edition of *Japanese Economic Development* looks at Japan's economic history from the nineteenth century through to World War II recasting analysis of Japan's economic past in the light fresh theoretical perspectives in the study of economic history and development Francks draws out the historical roots of the institutions and practices on which Japan's post war economic miracle was based and provides a comparative framework within which the Japanese case can be

understood and related to development in the rest of the world New features for this edition include textboxes summarising key concepts expanded coverage of the early modern economy the traditional sector and the international context of Japanese growth an increased number of case studies fully up dated references glossary and bibliography Taking a thematic approach this textbook demonstrates how studying the first example of Asian industrialisation can provide the basis for an alternative non western narrative of development As it such is an important resource for undergraduate and postgraduate courses on the Japanese economy as well as comparative economic development and economic history more generally

An East Asian Route of Industrialization? The Case of Japan, 1868-1937 Peer Vries, 2022-08-01 In this book Peer Vries is the first scholar to provide an extensive test of the claim that industrialization in East Asia in particular in Japan between the Meiji Restoration and World War Two would have been much more labour intensive than industrialization in the West He does this by systematically comparing the role and importance of labour and capital in Japan and in a number of Western countries at a similar stage of their industrial development He uses macro economic data as well as specific observations by people at the time It turns out that there is no reason to distinguish a specific labour intensive Japanese route of industrialization His comparative analysis provides us with a better understanding of the logic of industrialization in both West and East

Meiji Japan: The emergence of the Meiji state Peter Francis Kornicki, 1998 This set provides a comprehensive introduction and contains the most important critical literature on the history and historiography of nineteenth and early twentieth century Japan
