Technology And Change In East West Relations:

Technology And Change In East-west Relations F. Stephen Larrabee, F. Stephen Larrabee, 2019-07-11 This volume is based on a series of papers delivered at the conference by specialists from the United States and both Eastern and Western Europe. It argues that arms control must shift its focus from quantities to qualities of weapons and attempt to constrain military technology. *Technology and Change in East-West Relations*, 1988. *Innovation and Technological Change in Eastern Europe* Michael Fritsch, Horst Brezinski, Horst Dieter Brezinski, 1999-11-25 Reserach suggests that innovation and technical change are crucial for the economic recovery of the former centrally planned countries in Central and Eastern Europe. This text analyzes the development of innovation systems and technology in this region from various perspectives.

East-West Relations and the Future of Eastern Europe Morris Bornstein, Zvi Gitelman, William Zimmerman, 2024-11-18 Both domestic and foreign policy considerations led Eastern European nations in the 1970s to involve their economies more deeply with the West. This increased economic interdependence encompassed trade, technology transfer through industrial cooperation, and international credit. These growing links came as a mixed blessing as Western economic problems (inflation, recession, unemployment, energy) began to affect the economic development and political stability in Eastern Europe. First published in 1981, *East West Relations and the Future of Eastern Europe* examines the implications of these problems for East-West relations and the domestic scene in Eastern Europe. The authors analyze the interaction of economic and political forces at three interlocking levels: international, regional, and national. The first part deals with the evolution of East-West political and economic relations in the 1970s and the prospects for the 1980s and considers the implications of developments in East-West relations for Soviet and East European regional economic, political, and military ties. Thereafter, experts from East and West offer their perspectives on political-economic strategies for individual East European countries in the context of their regional and international relations. This book will be of interest to students of comparative economics, international trade, and international relations.

After the Cold War Alpo M. Rusi, 1991-05-31 This book provides new and exceptional interpretations in regard to the post-World War 2 history of the East-West conflict and calls for interdisciplinary approaches in analyzing international relations. The systematic and political processes are undoing the division of Europe and restoring an organically interdependent continent. The events of 1989 in Eastern Europe are but a harbinger of a new security order in Europe and for the first time since the Treaty of Westphalia of 1648, Europe tries to look beyond state-centered concepts of security.

Soviet Union and Eastern Europe in the Global Economy Marie Lavigne, 1992-07-09 The Soviet Union and Eastern Europe are moving away from a centrally planned economy toward integration within the global economy How did this transition begin Is this an aim which all the countries can afford What conditions are to be met so that the countries will achieve a level of development comparable with the average level of their industrial partners In this 1992 volume leading international political economists from both the East and West provide an in depth analysis of these questions The contributors assess how the transition to the market requires liberalizing foreign trade introducing convertibility and transforming property structures all of which are also part of the ongoing domestic reform They also examine how these countries overcome their development lag and implement a restructuring policy
