Technology and Society in Ming China, 1368-1644 Francesca Bray, 2000 Historians of Chinese technology have tended to pay little attention to the Ming dynasty characterizing it as a stagnant period unmarked by significant inventions of the kind that in Europe gave rise to the industrial revolution and the modern world Yet the Ming was a period of extraordinary social cultural and economic vitality and change and it would be curious if technology had played no part in these changes This pamphlet approaches the material world of the Ming from a more anthropological perspective than has been conventional among
