Technology And The Spirit:

The Spiritual Technology of Ancient Egypt Edward F. Malkowski, 2007-10-03 How ancient Egyptians understood quantum theory Investigates the history of how modern religion and the Age of Science were inspired by the sacred science of the ancients Examines how quantum theory explains that the cosmos arises from consciousness Reveals the unanimity between Schwaller de Lubicz's sacred science and the science of a cosmos governed by quantum mechanics Since the dawn of the Age of Science humankind has been engaged in a methodical quest to understand the cosmos With the development of quantum mechanics the notion that everything is solid matter is being replaced with the idea that information or thought may be the true source of physical reality Such scientific inquiry has led to a growing interest in the brain's unique and mysterious ability to create perception possibly through quantum interactions Consciousness is now being considered as much a fundamental part of reality as the three dimensions we are so familiar with Although this direction in scientific thought is seen as a new approach the secret wisdom of the ancients presented just such a view thousands of years ago Building on Ren A Schwaller de Lubicz's systematic study of Luxor's Temple of Amun Mut Khonsu during the 1940s and 50s Edward Malkowski shows that the ancient Egyptians worldview was not based on superstition or the invention of myth but was the result of direct observation using critical faculties attuned to the quantum manifestation of the universe This understanding of reality as a product of human consciousness provided the inspiration for the sacred science of the ancients precisely the philosophy modern science is embracing today In the philosophical tradition of Schwaller de Lubicz *The Spiritual Technology of Ancient Egypt* investigates the technical and religious legacy of ancient Egypt to reveal its congruence with today's New Science

consequences of the modern world's worship of power and the kinds of technologies this misdirected worship produces Jacques Ellul's death in 1994 and Paul Virilio's death in 2018 may have prevented the maturation of this nascent theological tradition but this book will aid in this tradition's ripening through the presentation of an illuminating way to read these two unique prophetic intellectuals Redefining Spiritual Spaces in the Age of Technology Stacey K.
