Telecommunications And Geography:

Telecommunications and Geography Aharon Kellerman, 1993-07-06 He then outlines the concept and processes of telecommunications geography explaining in detail the geographical dimensions of the topic in each of the three scales Broad in conception original and thought provoking in structure and rich in example and illustration this book opens up an important new field for urban economic and human geography and will be widely read **Communication Geography Newsletter** International Geographical Union. Commission for the Geography of Telecommunications and Communications, 1996 **Cities in the Telecommunications Age** James O. Wheeler, Yuko Aoyama, Barney Warf, 2000 Offering insights into the challenges and implications for urban planning in the age of telecommunications this work assembles recent research on how changes and innovations in the economic system are being fuelled by networks of telecommunicators **Elements for a Geography of Telecommunications** Henry Bakis, 1980 **Collapsing Space and Time** Stanley D. Brunn, Thomas R. Leinbach, 1991 A text which looks at such topics as geography and communication telecommunications services and economic restructuring as well as the political social and cultural aspects of communications expansion **The Geography of the Internet** Emmanouil Tranos, 2013-01-01 This timely book presents a wide range of quantitative methods including complex network analysis and econometric modelling to illustrate how the Internet both follows and at the same time challenges more traditional geographies Emmanouil Tranos explores the spatiality of the Internet its physical infrastructure and the geographic and socio economic factors that shape its spatial distribution He shows that although the Internet is a technical system with strong topological attributes an almost hidden spatial dimension also exists The scattering of Internet Backbone Networks across European city regions is compared with the aviation network in order to better understand the topology of the digital infrastructure Finally a causality analysis demonstrates the significant positive effect of the Internet infrastructure in the economic development of regions characterized by high absorptive capacity This book will prove a highly fascinating read for those with an interest in Internet geographies ICTs regional development and infrastructure digital economy network analysis and regional science Practitioners working on local and regional development as well as those focusing on ICTs digital economy and smart cities will also find this book to be an invaluable reference tool **Broadband Telecommunications and Regional Development** Tony H. Grubestic, Elizabeth A. Mack, 2015-09-07 Broadband is one of the most transformative technologies of the 21st century yet our understanding of its regional impacts remains somewhat rudimentary Not only are issues of broadband pricing and speed relevant in this context but the overall quality of service for broadband can often dictate its impacts on regional development This book illuminates the regional impacts of this pervasive and important technology The principle aim of this book is to deepen our understanding of broadband and its connections to regional development First it uses a geospatial lens to explore how the relationship between broadband and regional development influences access to technology platforms dictates

provision patterns and facilitates the shrinkage of space and time in non uniform and sometimes unexpected ways Second it book provides a comprehensive guide that details the strengths and weaknesses of publically available broadband data and their associated uncertainties allowing regional development professionals and researchers to make more informed decisions regarding data use analytical models and policy recommendations Finally this book is the first to detail the growing importance of broadband to digital innovation and entrepreneurship in regions This book will be of interest to regional development professionals and researchers in economics public policy geography regional science and planning
