Telecommunications Function In The British Post Office:

The Politics of Telecommunications Mark Thatcher, 1999 This book confronts some of the most important questions related to liberalization regulation and the role of the nation state in an increasingly international economy In the face of powerful transitional pressures for change to what extent are states able to maintain stable institutional frameworks Do different domestic structures generate dissimilar patterns of policy making and economic performance How important are past institutional choices to subsequent reform The author addresses these questions through a study of the transformations of a strategic economic sector telecommunications in Britain and France over the past three decades It analyses the theoretical strengths and weaknesses of various models of public policy formation and the role and reform of national institutions and the continuing role of the nation state

The Telecommunications Function in the British Post Office Douglas C. Pitt, 1980

Privatisation and Liberalisation in European Telecommunications Willem Hulsink, 2012-12-06 This book combines a detailed sector specific study of comparative telecommunications regimes set in the context of the EC with an extensive historical and empirical analysis of individual policy management and change as experienced by three diverse regulatory cultures namely Britain the Netherlands and France By adopting a comprehensive analytical framework based on far reaching literature the author explores a wide range of theories addressing key issues at the forefront of contemporary political and academic debate as Do nation states matter in the globalizing telecommunications industry Does the common challenge of techno global telecommunications restructuring elicit different national responses What is the significance of a single speed or multi speed Europe in implementing telecommunications governance regimes

Telecommunications Services Brian Bolton, 1993

Visions of a Digital Nation Jacob Ward, 2024-02-06 Why the privatization of British Telecom signaled a pivotal moment in the rise of neoliberalism and how it was shaped by the longer development and digitalization of Britain s telecommunications infrastructure When Margaret Thatcher sold British Telecom for 3 6 billion in 1984 it became not only at the time the largest stock flotation in history but also a watershed moment in the rise of neoliberalism and deregulation In Visions of a Digital Nation Jacob Ward offers an incisive interdisciplinary perspective on how technology prefigured this pivot Giving due consideration to the politicians engineers and managers who paved the way for this historic moment Ward illustrates how the decision validated the privatization of public utilities and tied digital technology to free market rationales In this examination of the national and at times global history of technology Ward s approach is sweeping Utilizing infrastructure studies environmental history and urban and local history Ward explores Britain s nationalist and welfarist plans for a digital information utility and shows how these projects contested and adapted to the market turn under Margaret Thatcher Ultimately Visions of a Digital Nation compellingly argues that politicians did not impose neoliberalism top down but that technology engineers and managers shaped these politics from the bottom up

Masters of the Post Duncan Campbell-Smith, 2011-11-03 The origins of the Post Office go back to the early years of the Tudor monarchy Brian

Tuke a former King's Bailiff in Sandwich was acknowledged as the first Master of the Posts by Cardinal Wolsey in 1512 and went on to build up a network of postmasters across England for Henry VIII. Over the following five hundred years the Royal Mail expanded to an unimaginable degree to become the largest employer in the country and the face of the British state for most people in their everyday lives. But it also faced the demands of an increasingly commercial marketplace. With the election of Margaret Thatcher in 1979 the possibility of privatising the Royal Mail has prompted passionate arguments and has added immeasurably to the difficulties of running it. In charting the whole of this extraordinary story Duncan Campbell Smith recounts a series of remarkable tales including how postal engineers built the first programmable computer for the wartime code breakers of Bletchley Park and how the Royal Mail managed to successfully continue delivering post to the front lines during two world wars but also how they failed to avert the Great Train Robbery of 1963. He brings to life many of the dominant personalities in the Royal Mail's history from Rowland Hill who imposed a uniform penny post and set the great Victorian expansion on its way to Tony Benn who championed the modernisation of the service in the 1960s and Tom Jackson who led the postal workers' biggest union through fifteen frequently stormy years up to 1982. This is the first complete history of the Royal Mail up to the present day based on its comprehensive archives and including the first detailed account of the past half century of Britain's postal history made possible by privileged access to confidential records. Today's debate over the future of the Royal Mail is shown to be just the latest chapter in a centuries-old conflict between its roles raising revenue and serving the public. Will its employees remain like Brian Tuke's postmasters' servants of the Crown? This book could hardly appear at a more timely moment.

Regulation and the Nature of Postal and Delivery Services Michael A. Crew, Paul R. Kleindorfer, 2012-12-06. This book is based on a conference on Regulation and the Evolving Nature of Postal and Delivery Services 1992 and Beyond held at Village PTT La Londe les Maures France on March 18 1992. Leading practitioners worldwide postal administrations and the express delivery industry as well as a number of regulators academic economists and lawyers examine the important policy and regulatory issues facing the postal and delivery industries. This includes such issues as international postal policy and the role of the Universal Postal Union regulation and terminal dues competition entry and the role of scale and scope economies the nature and role of costs analysis in postal service productivity and service standards.
