Telling Our Own Stories:

Telling Our Own Stories Shetler, 2021-10-11 In this collection of ethnic group histories written by authors from the Mara Region of Tanzania local people tell their stories as a way to inspire development that builds on the strengths of the past It combines histories from the small but closely related ethnic groups of Ikizu Sizaki Ikoma Ngoreme Nata Ishenyi and Tatoga in South Mara east of Lake Victoria and west of Serengeti National Park Many of the authors compiled their stories by meeting with groups of elders They were concerned to preserve history for the next generation who had not taken the time to learn the stories orally The stories were written in Swahili and translated into English with annotations and an introduction so that readers not familiar with this region might also share in the experience It also includes transcriptions of oral interviews with some of the same stories to get a sense of the ongoing conversations about the past This collection makes local history told in a local idiom accessible to students of African history interested in social memory and the creation of ethnicity

Tell Our Story Julie Reid, Dale T. McKinley, 2020-05-02 Focusing on three South African communities the authors dismiss the idea that some groups are voiceless arguing that they are being deliberately ignored by dominant news media The dominant news media are often accused of reflecting an elite bias privileging and foregrounding the interests of a small segment of society while ignoring the narratives of the majority The authors of *Tell Our Story* investigate this problem and offer a hands on demonstration of listening journalism and research in practice In the process they dismiss the idea that some groups are voiceless arguing that what is often described in such terms is mostly a matter of those groups being deliberately ignored Focusing their attention on three very different South African communities they delve into the life and struggle narratives of each exposing the divide between the stories told by the people who actually live in the communities and the way in which those stories have been understood and shaped by the media The three communities are those living in the Glebelands hostel complex in Durban where over 100 residents have been killed in politically motivated violence in the past few years the Xolobeni community on the Wild Coast which has been resisting the building of a new toll road and a dune mining venture and Thembelihle a settlement south west of Johannesburg that has been resisting removal for many years The book concludes with a set of practical guidelines for journalists on the practice of listening journalism

outline performance tips adaptatoin props etc and ideas on how to create original stories for storytelling **Making Sense of the Bible** Helen-Ann Hartley,2011-06-17 One of a series of 6 small books dealing in a short and accessible way with the key concerns for Christians Again and again we hear that such and such an opinion is not biblical implying that the Bible speaks with a unified voice on any matter With humour and examples drawn from art and life Helen Ann Hartley argues that our reading of this varied collection of writings has to be generous not exclusive To appreciate fully the Bible s richness and diversity we have to wrestle critically and creatively with themes that attract us and repel us Not only should we draw meaning from the Bible we must let our lives contribute meaning to the stories it tells engaging in conversation with those stories and allowing them to urge us into being to think speak and act Ultimately to make sense of the Bible we need to make sense of who we are in relationship to God The Sleeper Must Awaken Jean Erasmus,2007-09 The human condition is a strange one at best Finding ourselves in a world nearly void of any profound natural predators with the ability to unconditionally love and solve the most complex problems in the most creative ways we choose to make the world an ever increasingly dangerous place in stead of creating Utopia In our relentless pursuit of happiness and perfection we create the very opposite The Sleeper Must Awaken dives deep into the human psyche exploring from the archetypal dreamscapes of our subconscious minds to the remarkable similarities between Super String Theory and ancient mysticism It opens the door to a journey within ourselves searching for the root of this phenomenon and presenting possible solutions to a world on the edge Author Bio Dr Jean Erasmus is a South African born medical practitioner Before moving to the United Kingdom he has worked mostly with less fortunate souls managing a wide variety of illnesses ranging from Tuberculosis to HIV AIDS He has also been involved in medical legal work as well as lecturing in Primary Health Care The world of medicine where cold evidence based science intermingles with the warm complex emotional and spiritual human being has sparked an interest in Jean leading him to pursue the connection between these two diverse poles of the human condition This pursuit offset by the dramatically changing physical social and spiritual landscape of the world led him into writing this book in an attempt to finding the missing piece of the current human led world puzzle and to present possible solutions Your Success Lies in What Drives You Letshego Tau,2016-06-15 This book focuses readers on the importance of self worth determination and the drive to follow your hearts desires Unleashing of incredible power from within and what you can build up today that can leave a legacy of your name for generations and generations to know that you ever existed The author shares important keys to a powerful life and living the dream that matters the most *The C Word: Charisma - Get What the Greats Have Got Ebook* David Gillespie,Mark Warren,2011-02-25 Public speaking communication and presenting with power can all be terrifying prospects however experienced you become and cultivating a charismatic persona in our working lives is a priceless skill This book is a humorous and incisive piece of observation by Dave Gillespie and Mark Warren which demonstrates the right and wrong level of status to adopt for our business lives Whilst remaining fun Charisma shows the

reader how to tap into their own personal charisma and communicate with maximum impact It studies a range of great communicators from historical figures to modern day greats and highlights how their skills translate into what we call Charisma Everyone from Franklin D Roosevelt through Steve Jobs to Joanna Lumley is covered A series of fun but practical exercises will help you to build your communication skills and use body language effectively **The Handover** David Runciman, 2023-11-14 Witty and refined Runciman's point is that the alliance between even a democratic government and a selfish AI could derail civilization Gideon Lewis Kraus New Yorker An eminent political thinker uses our history with states and corporations artificial agents to which we have granted immense power to predict how AI will remake society Countless books news reports and opinion pieces have announced the impending arrival of artificial intelligence with most claiming that it will upend our world revolutionizing not just work but society overall Yet according to political philosopher and historian David Runciman we've actually been living with a version of AI for 300 years because states and corporations are robots too In *The Handover* Runciman explains our current situation through the history of these artificial agents we created to rescue us from our all too human limitations and demonstrates what this radical new view of our recent past means for our collective future From the United States and the United Kingdom to the East India Company Standard Oil Facebook and Alibaba states and corporations have gradually and then much more rapidly taken over the planet They have helped to conquer poverty and eliminate disease but also unleashed global wars and environmental degradation As Runciman demonstrates states and corporations are the ultimate decision making machines defined by their ability to make their own choices and crucially to sustain the consequences of what has been chosen And if the rapid spread of the modern state and corporation has already transformed the conditions of human existence new AI technology promises the same But what happens when AI interacts with other kinds of artificial agents the inhuman kind represented by states and corporations Runciman argues that the twenty first century will be defined by increasingly intense battles between state and corporate power for the fruits of the AI revolution In the end it is not our own human relationship with AI that will determine our future Rather humanity's fate will be shaped by the interactions among states corporations and thinking machines With clarity and verve *The Handover* presents a brilliantly original history of the last three centuries and a new understanding of the immense challenges we now face [Telling True Stories](#) Mark Kramer, Wendy Call, 2007-01-30 Interested in journalism and creative writing and want to write a book Read inspiring stories and practical advice from America's most respected journalists The country's most prominent journalists and nonfiction authors gather each year at Harvard's Nieman Conference on Narrative Journalism *Telling True Stories* presents their best advice covering everything from finding a good topic to structuring narrative stories to writing and selling your first book More than fifty well known writers offer their most powerful tips including Tom Wolfe on the emotional core of the story Gay Talese on writing about private lives Malcolm Gladwell on the limits of profiles Nora Ephron on narrative writing and screenwriters Alma Guillermoprieto on telling the story and telling
