Temporalization Of Time:

The Temporalization of Time Mike Sandbothe, 2001 This book deals with the philosopher Martin Heidegger and the chemist physicist Ilya Prigogine two prominent advocates of pioneering time concepts in the 20th century Mike Sandbothe provides a trans disciplinary introduction to modern debate on the problem of time and also suggests how the basic tendencies in this debate might be pragmatically interlinked

The Temporalization of Time Mike Sandbothe, 2001-10-31 The subject of time is currently experiencing a revival in the most diverse areas of academic discourse Contemporary time theory attempts to relate theoretical time concepts both to one another and to everyday experience of time This book deals with the philosopher Martin Heidegger and the chemist physicist Ilya Prigogine Nobel Prize for Chemistry 1977 two prominent advocates of pioneering time concepts in the 20th century The author not only provides a transdisciplinary introduction to modern debate on the problem of time but suggests how the basic tendencies in this debate might be pragmatically interlinked with each other

Meaning Takes Time to Unfold: Towards a Heideggerian Ontology of Temporal Differentiation Renxiang Liu, 2025-03-29 This book proposes a reconsideration of the intertwinement of time meaning and the piecemeal unfolding of things It gives a phenomenological ontological account of the time horizon at work in each being s manifestation explores the notion of time as a productive resistance in this manifestation and redefines human finitude and subjectivity accordingly to enable an attentive mode of waiting for meaning The discussion is significantly informed by but not limited to the works of Martin Heidegger and thus responds to the question of the turn in Heidegger s career by suggesting a systematic framework centered upon a generalized finitude of Being as such which may have consistently underlain Heidegger s thinking before and after the turn As subjectivity receives a qualified affirmation in the book in contrast to both subjectivist voluntarism and impersonalism this text also opens up the possibility to think of the plurality of human beings as essential to being human While the book is a continuation of a few traditions in continental philosophy which takes time philosophically seriously it is distinctive in not considering time abstractly but always situating its conceptualization in the context of what it means for a thing or an event to be Instead of a mere measure of change an itself invariant structure of happening or a new metaphysical absolute time is interpreted here as the way beings are The interpretation comes from and seeks to do justice to the basic experience of time bringing about wonder fulfillment or disappointment The book appeals to students and researchers working on Heidegger scholarship phenomenology and more generally the philosophy of time and subjectivity It inspires a patience for meaning in mortal transience to find dignity and beauty in what will eventually expire that is in life as such

Social Acceleration Hartmut Rosa, 2013-05-14 Hartmut Rosa advances an account of the temporal structure of society from the perspective of critical theory He identifies in particular three categories of change in the tempo of modern social life technological acceleration evident in transportation communication and production the acceleration of social change reflected in cultural knowledge social institutions and

personal relationships and acceleration in the pace of life which happens despite the expectation that technological change should increase an individual's free time. According to Rosa, both the structural and cultural aspects of our institutions and practices are marked by the shrinking of the present, a decreasing time period during which expectations based on past experience reliably match future results and events. When this phenomenon combines with technological acceleration and the increasing pace of life, time seems to flow ever faster, making our relationships to each other and the world fluid and problematic. It is as if we are standing on slipping slopes, a steep social terrain that is itself in motion and in turn demands faster lives and technology. As Rosa deftly shows, this self-reinforcing feedback loop fundamentally determines the character of modern life.

Time and Causality Across the Sciences Samantha Kleinberg, 2019-09-26 Explores the critical role time plays in our understanding of causality across psychology, biology, physics, and the social sciences.

International Law and Time Klara Polackova Van der Ploeg, Luca Pasquet, León Castellanos-Jankiewicz, 2022-12-16 This book explores the close, complex, and consequential yet to a large extent implicit relationship between international law and time. There is a conspicuous discrepancy between international law's technical preoccupation with the mechanics of temporal rules and the absence of more foundational considerations of how time, both as an irrepressible physical dimension manifesting in the passage of time and as a social construct shaped by diverse social and cultural factors, impacts and interacts with international law. Divided into five parts and 21 chapters, this book explores key aspects of the relationship between international law and time and puts the spotlight on time's fundamental significance for international law as a legal order and as a discipline. Pursuing diverse approaches to international law, the authors consider the notion's significance, manifestations, uses, and implications of time in international law in a wide range of contexts and offer insights into the various ways in which international law and international lawyers cope with time, both in terms of constructing narratives and in devising and employing particular legal techniques.

Heidegger's Temporal Idealism William D. Blattner, 1999-01-13 A systematic reconstruction of Heidegger's account of time and temporality in *Being and Time*.

Derrida and the Political Richard Beardsworth, 2013-04-15 Jacques Derrida, one of the most influential, controversial, and complex thinkers of our time, has come to be at the centre of many political debates. This is the first book to consider the political implications of Derrida's deconstruction. It is a timely response both to Derrida's own recent shift towards thinking about the political and to the political focus of contemporary Continental philosophy. Richard Beardsworth's study *Derrida and the Political* locates a way of thinking about deconstruction using the tools of political philosophy. Richard Beardsworth has provided students of philosophy, politics, and critical theory with a thought-provoking, upper-level introduction to Derrida, a work as a political theorist.

Writing Time Sean Franzel, 2023-11-15 Cowinner of the Aldo and Jeanne Scaglione Prize for Studies in Germanic Languages and Literatures. *Writing Time* shows how serial literature, based in journals and anthologies, shaped the awareness of time at a transformative moment in the European literary and political landscapes. Sean Franzel explores how German

speaking authors and editors write time both by writing about time and by mapping time itself through specific literary formats Through case studies of such writers as F J Bertuch K A B ttinger J W Goethe Ludwig B rne and Heinrich Heine Franzel analyzes how serial writing predicated on open ended continuation becomes a privileged mode of social commentary and literary entertainment and provides readers with an ongoing history of the present or Zeitgeschichte Drawing from media theory and periodical studies as well as from Reinhart Koselleck s work on processes of temporalization and untimely models of historical time Writing Time presents smaller literary forms the urban tableau cultural reportage and caricature as new ways of imagining temporal unfolding recentering periodicals and other serial forms at the heart of nineteenth century print culture

Governing the Child in the New Millennium Kenneth Hultqvist, Gunilla Dahlberg, 2013-01-11 The contributors and editors of this volume begin from the assumption that the changes wrought by globalization compel us to reflect upon the status of the child and childhood at the end of the 20th century Their essays consider what techniques and technologies are used to govern the child what role the family plays what is global and what is culturally specific in the changes and how the subject is constructed and construed

The New Yearbook for Phenomenology and Phenomenological Philosophy Burt Hopkins, John Drummond, 2015-03-24 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl s groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer

Social Systems Niklas Luhmann, 1995 Germany s most prominent social thinker here sets out a contribution to sociology that aims to rework our understanding of meaning and communication He links social theory to recent theoretical developments in scientific disciplines

Walter Benjamin and the Critique of Political Economy Duy Lap Nguyen, 2022-07-14 Exploring the connections between Walter Benjamin s philosophy of history and a Marxian Critique of Political Economy Duy Lap Nguyen analyses Benjamin s early writings and their development into a distinct understanding of historical materialism Benjamin s historically materialist conception of history is shown to be characterised by a focus on the religion of capitalism the mythology of the state and messianic time Revealing these factors Nguyen joins up Benjamin s philosophical critique of the Kantian conception of history alongside the historical trajectory of capitalism he subscribed to Influenced by the theory of fascism outlined by German Marxist theorist Karl Korsch we see how Benjamin s own theory of revolution and redemption in capitalist society developed into a sophisticated critique Essential to Benjamin s materialist critique was a recognition of the fallibility of the Enlightenment notion of progress as well as the need to overturn the political and economic catastrophes which enable capitalism and fascism to thrive In mapping the exact course of Benjamin s critical historical materialism

Nguyen fully explicates the unique contribution he made to western Marxism Relational Theory Christine M. Koggel, Ami Harbin, Jennifer J. Llewellyn, 2025-04-18 Relational theory starts from the ontological fact of our being in networks of relationships and draws out what this means for theories of knowledge and for moral and political theory This book uses insights from feminist relational theory to outline the ontological epistemological and moral political implications of this theoretical approach The chapters in this volume focus on relationships of power and oppression how these relationships shape who is taken to have knowledge and who is dismissed or ignored and what all of this means for theories of equality justice and moral and political theory more generally A focus on relationships of power and oppression opens up an examination into structures such as colonialism and capitalism that shape interconnected networks of relationships between humans and human and non human entities and ecosystems This volume which now includes eight additional chapters published both before and after the original special issue offers a significant step forward in the development of feminist relational theory Following early forays in identifying and criticizing mainstream liberal theory in the Western tradition chapters in this collection draw on approaches by anti oppression theorists found in critical disability critical race anti colonial decolonial and non Western theories to further broaden the descriptions and analyses of relationships and networks of relationships and to extend and advance feminist relational theory and its applications The chapters in this book were originally published in the Journal of Global Ethics **Sartre and the Phenomenology of Education** Cameron Bassiri, 2023-11-02 Through an engagement with texts that span the entirety of Sartre s career Sartre and the Phenomenology of Education Education for Resistance provides phenomenological analyses of two primary orientations toward education Cameron Bassiri develops a Sartrean approach to education calling it committed education and argues that such education is ultimately a form of resistance to need scarcity the practico inert and their cultural manifestations Bassiri argues that a genuine liberating form of education cultivates the imagination instills the appropriate orientation to time in students and ultimately produces a culture of collective imagining He then develops its complementary opposite institutionalized education which is a form of passive acceptance assimilation and oppression Oppressive approaches to education cultivate perception while repressing or instrumentalizing the imagination impose an understanding of time on students and ultimately produce a culture of perception and restricted serialized imagining Through these analyses Bassiri demonstrates the importance of education for the formation of subjectivity highlighting the role that existential psychoanalysis plays in teaching as well as two distinct forms of the phenomenological reduction operative in the respective orientations toward education **Exploring New Temporal Horizons** Carmen Leccardi, Paolo Jedlowski, Alessandro Cavalli, 2023-10-20 In this book leading sociologists explore how in our digital age of connectivity temporal acceleration and real time simultaneity impact personal experience relations between generations and institutional processes The authors analyse the entanglement between past and future and explain how our ability to conceive the future is based not only upon

the memory of the past but also on forecasts about environmental crisis Bringing memory and future studies into a unique dialogue they highlight the crucial role of the past elaboration processes in freeing the future from the weight of trauma and renewing the ability to hope Offering a sophisticated and innovative social theory in a burgeoning field this is a much needed intervention to the current temporal crisis of social life and sociological debates *Unlocking the Brain* Georg

Northoff,2014 What makes our brain a brain This is the central question posited in *Unlocking the Brain* By providing a fascinating venture into different territories of neuroscience psychiatry and philosophy the author takes a novel exploration of the brain's resting state in the context of the neural code and its ability to yield consciousness *Alternative*

Temporalities Teresa Valentini,Angela Weiser,John Zilcosky,2024-11-30 Alternative temporalities have often emerged as a reaction to the normativizing force of time demonstrating that time can be used as an instrument of power and oppression but also as a means to resist this very oppression *Alternative Temporalities* draws on analyses of modern literature to examine this often neglected role of time By exploring forms of temporal resistance in artistic representation such as short stories and novels that challenge the imposition of colonial gender or capitalist temporal orders the book reveals how storytelling can be an essential tool in questioning and pushing back against coercive temporal structures The book analyses literary representations of time that challenge dominant temporalities and intersect different disciplines such as gender and sexuality studies trauma and Indigenous studies race and identity and religion It features narrative analyses proposing alternative embodied experiences of time focusing on topics including the temporality of the AIDS affected body the experience of time in prison and slowness in opposition to modern acceleration Ultimately *Alternative Temporalities* aims to create new theories as well as practices that may foster more diverse and inclusive ways of perceiving and embodying time

Dictionary of Non-Philosophy François Laruelle,2016-03-31 In *The Dictionary of Non Philosophy* the French thinker François Laruelle does something unprecedented for philosophers he provides an enormous dictionary with a theoretical introduction carefully crafting his thoughts to explain the numerous terms and neologisms that he deems necessary for the project of non philosophy With a collective of thinkers also interested in the project Laruelle has taken up the difficult task of creating an essential guide for entering into his non standard non philosophical terrain And for Laruelle even the idea of a dictionary and what a dictionary is become material for his non philosophical inquiries As his opening note begins Thus on the surface and within the philosophical folds of the dictionary identity and its effect upon meaning are what is at stake
