Marrying Market Timing with Human-Centered Urban Design: How Investors and Municipalities Can Better Realize Transit Oriented Development Jared Katseff, 2015-06-03 My thesis sought to better understand the interaction between transit investments and property values Specifically I sought to understand when in the investment cycle residential properties went from their pre to post transit value and what urban design impacts could help amplify this change For each of the corridors studied market sales transaction data was collected for all residential properties that were within a half mile walkshed of each new station From this data we calculated growth rate premiums that existed for the property values in the transit area walksheds versus a control as well as how these premiums evolved over time Surveys were also conducted in each of the corridors to document and quantify the existence of various characteristics associated with walkable human centered urban design This data was applied to the market sales data in a multiple regression analysis to determine which urban design features were most associated with higher property value growth rates [The High Cost of Free Parking](#)

Donald Shoup, 2017-10-20 One of the American Planning Association's most popular and influential books is finally in paperback with a new preface from the author on how thinking about parking has changed since this book was first published In this no holds barred treatise Donald Shoup argues that free parking has contributed to auto dependence rapid urban sprawl extravagant energy use and a host of other problems Planners mandate free parking to alleviate congestion but end up distorting transportation choices debasing urban design damaging the economy and degrading the environment Ubiquitous free parking helps explain why our cities sprawl on a scale fit more for cars than for people and why American motor vehicles now consume one eighth of the world's total oil production But it doesn't have to be this way Shoup proposes new ways for cities to regulate parking namely charge fair market prices for curb parking use the resulting revenue to pay for services in the neighborhoods that generate it and remove zoning requirements for off street parking Such measures according to the Yale trained economist and UCLA planning professor will make parking easier and driving less necessary Join the swelling ranks of Shoupistas by picking up this book today You'll never look at a parking spot the same way again
