to explore in order to understand better music's place and its significance in nineteenth century British culture. Analysing how music took part in and commented on a wide range of scientific, literary and cultural discourses, the book expands our knowledge of how music was central to the nineteenth century imagination. Like its companion volume *The Idea of Music in Victorian Fiction* (Ashgate 2004) edited by Sophie Fuller and Nicky Losseff, this book provides a meeting place for literary studies and musicology with contributions by scholars situated in each field. Areas investigated in these essays include the Romantic interest in national musical traditions, the figure of the Eolian harp in the poetry of Coleridge and Shelley, the recurring theme of music in Blake's verse settings of Tennyson by Parry and Elgar that demonstrate how literary representations of musical ideas are refigured in music, George Eliot's use of music in her poetry to explore literary and philosophical themes, music in the verse of Christina and Dante Gabriel Rossetti, the personification of lyric Sappho in a song cycle by Granville and Helen Bantock, and music and sexual identity in the poetry of Wilde, Symonds, Michael Field, Beardsley, Gray and Davidson.

**Twenty-First Century Perspectives on Victorian Literature** Laurence W. Mazzeno, 2014-03-06 Victorian literature's fascination with the past, its examination of social injustice and its struggle to deal with the dichotomy between scientific discoveries and religious faith continue to fascinate scholars and contemporary readers. During the past hundred years traditional formalist and humanist criticism has been augmented by new critical approaches including feminism and gender studies, psychological criticism, cultural studies and others. In *Twenty First Century Perspectives on Victorian Literature* twelve scholars offer new assessments of Victorian poetry, novels and nonfiction. Their essays examine several major authors and works and introduce discussions of many others that have received less scholarly attention in the past. General reviews of the current status of Victorian literature in the academic world are followed by essays on such writers as Charles Dickens, Alfred Tennyson, Thomas Hardy and the Brontë sisters. These are balanced by essays that focus on writing by women, the development of the social problem novel and the continuity of Victorian writers with their Romantic forebears. Most importantly, the contributors to this volume approach Victorian literature from a decidedly contemporary scholarly angle and write for a wide audience of specialists and non specialists alike. Their essays offer readers an idea of how critical commentary in recent years has influenced and in some cases changed radically our understanding of and approach to literary study in general and the Victorian period in particular. Hence scholars, teachers and students will find the volume a useful survey of contemporary commentary not just on Victorian literature but also on the period as a whole.
